CPP Exam Essential Topics Study Guide 2013 ExamREVIEW, 2012-09-23 In the practical real world a CPP may be a security manager, an external consultant or a law enforcement agent. For purpose of the exam however, you want to position yourself as a hired consultant one who acts as an advisor to the company management. The company is your client and you are helping it out. You advise, you guide and you recommend. You need to understand your client. If your client is absolutely new to security, full scale interviews and statistical analysis on crimes may be necessary. However, if your client has a working security mechanism in place, then you should conduct assessment basing primarily on inputs from management. In other words, management determines the depth and scope of the security project. Management makes the decisions. You suggest ways to improve, then carry out the decisions made by management. You don't normally make decisions for your client. It is safe to say that you assume the role of project manager for your client's security project. The security project would start by discussing the scope of work with your client. The most important meeting between you and the client would be the initial goal setting and policy review meeting. Senior management is going to get involved and you are going to act as the facilitator. From this meeting, you become aware of the level of risk your client is willing to assume and accept. Your work would then start from there. When working on a project, it is important to understand the background and operation of the client. You also want to know what you are up against. Protection against vandalism is totally different from protection against terrorist attack. A CPP is more on the planning and management side of security. A security guard professional on the other hand is to provide client with

professional protective services It is believed that the CPP certification is more general in nature while the PSP certification is way more specific and in depth in physical security To summarize the major knowledge areas include Security Principles and TheoriesBusiness PrinciplesPersonnel Security Physical SecurityInformation SecurityCrisis Management Investigations Legal MattersWe give you knowledge information relevant to the exam specification To be able to succeed in the real exam you ll need to apply your earned knowledge to the question scenarios Many of the exam questions are written to be less straight forward They tend to be framed within the context of short scenarios An advice Do NOT rely on a single source for exam preparation To secure exam success always use multiple sources and read as much as possible *Qureshi Manual of Scientific Manuscript Writing for Medical Journals* Adnan I. Qureshi MD,2012-01-31 Nine out of every ten medical students residents and fellows attempt to write a manuscript during their training Yet after finishing the training only 1 or 2 would continue to write scientific manuscripts due to the effort involved in preparing a manuscript Most medical students residents fellows and even junior faculty consider writing a scientific manuscript harder than working grueling hours on the clinical service The manual of scientific manuscript writing was developed to guide for medical students residents fellows and junior faculty by providing a step by step pathway for successful preparation of a manuscript The manual is expected to reduce the usual 3 and 6 months at times frustrating effort to a 1 to 2 week streamlined process to complete a manuscript *Resources in Education* ,1997-04
