Posavac, 2015-02-12 The unique contribution of *Cracking the Code* is its spotlight on how the knowledge of consumer psychology principles can be used to improve managerial decision making and organizational performance Research on consumer behavior typically has a narrow focus and does not offer reliable and practical direction for marketers Taken collectively however the conclusions of research streams can provide valuable information from which managers can base their decisions The contributing authors of *Cracking the Code* offer a set of rules for managerial action that has been distilled from reviews of research areas in which they are experts The book contains systematic prescriptive advice based on state of the art knowledge from multiple research lines regarding how consumers think and choose The chapters cover fundamental topics such as new product management marketing mix strategy marketing communications and advertising social media and experiential marketing

Sustainable Capitalism and the Pursuit of Well-Being Neil E. Harrison, 2013-12-17 Sustainable development is the central challenge of the 21st Century How can human civilization continue to develop without destroying the natural systems on which it depends Environmentalists tell us that capitalism is the problem because it feeds our self interest They tell us that we have to restrain ourselves and only consume what the Earth can sustain Or governments must tell us what we can and cannot buy This book uses the science of complex systems to explain why governments cannot deliver sustainability or happiness and how self interest can be used to make society sustainable Capitalism won the Cold War until the Great Recession of 2008 it seemed to be the perfect system But more of us are unhappy even as it has ravaged the planet The central problem is the paradigm on which our social systems are founded that more consumption production possessions is always better Based on research from political economy philosophy and psychology this book shows that the problem is not self interest We are unhappy because we have been taught that our interests are material and that buying stuff will make us happy Yet social pressure to consume only prevents us from satisfying our basic psychological needs and fully enjoying life For that we need to pursue our personal well being Because this also reduces our material consumption environmental sustainability comes from each of us knowing what's truly good for our selves Even without the constant economic growth that harms the planet and damages our lives capitalism also is sustainable This book will be of interest to scholars and students of sustainability civil society activists and

social entrepreneurs thought leaders and policymakers An Introduction to Cyberpsychology Irene Connolly, Marion Palmer, Hannah Barton, Gráinne Kirwan, 2016-03-17 An Introduction to Cyberpsychology is the first book to provide a student oriented introduction to this rapidly growing and increasingly studied topic It is designed to encourage students to critically evaluate the psychology of online interactions and to develop appropriate research methodologies to complete their own work in this field The book is comprised of four main sections An overview of cyberpsychology and online research methodologies Social psychology in an online context The practical applications of cyberpsychology The psychological aspects of other technologies Each chapter includes Explanations of key terms and a glossary to facilitate understanding Content summaries to aid student learning Activity boxes discussion questions and recommended reading to guide further study Further resources for students and instructors are available on the book s companion website including audio and video links essay questions a multiple choice test bank and PowerPoint lecture slides Uniquely combining a survey of the field with a focus on the applied areas of psychology the book is designed to be a core text for undergraduate modules in cyberpsychology and the psychology of the internet and a primer for students of postgraduate programs in cyberpsychology
