key issues and elements of CPC it provides a practical approach grounded in experience It addresses multidisciplinary care in the management of children and their families discusses cases from an international perspective and shares examples from a variety of countries utilising cases across a range of ages and conditions demonstrating holistic care It represents the first case based manual on global CPC and is endorsed and promoted by the International Children s Palliative Care Network ICPCN Children s palliative care is a rapidly developing field both in the UK and internationally The provision of CPC varies considerably with provision often being insufficient and over 65% of countries having no recognised CPC service provision whatsoever As such while there are an estimated 21 6 million children who require palliative care in many areas of the world CPC is poor or non existent and children are treated like little adults without their distinctive needs being recognised or understood There is also a dearth of literature on CPC hence this clinical case based manual fills a gap in the market and is aimed at a global audience making it a unique text in the field

**Work-based learning around the mare balticum** . Baltic Sea Academy, Philipp Jarke, Max Hogeferster, 2015-03-19 At the 10th Hanseatic Conference 2015 in Hamburg representatives from business organisations academic institutions and policy makers from all countries around the Baltic Sea exchanged their experiences This book contains the presented papers and a summary of the participants discussion Vocational training has dramatically lost its appeal More and more young people rather opt for study programmes at the university and refuse to learn practical skills in vocational education However the qualifications of the high number of academics do not match the demand of SMEs for skilled workers and entrepreneurs as their knowledge is mostly theoretical At the same time due to demographic changes the number of school leavers in the Baltic Sea Region is declining Both developments have led to a dramatic shortage of skilled workers and entrepreneurs which is severely limiting growth and innovativeness of SMEs In order to overcome this crisis dual vocational training and dual degree study programmes have to be promoted substantially In dual vocational training enterprises can actively influence and improve the quality of the education their apprentices receive and in dual degree study programmes students can test and apply their theoretical knowledge which they acquire at the university simultaneously in the enterprises The contributors of this book describe how this reform of education policy can be implemented in practice
