

Sewing

1. Make sure that the coupling wheel is right.
 - Use the sewing foot (pages 10-11).
 - Do not run a threaded machine unless it has the material properly placed under the foot and the foot has been lowered.

Straight Forward Stitching

2. Leave the stitch width knob on "0".
3. Turn the stitch length dial (black figures) between 1 and 4 according to the length of stitch desired. When you start to sew, you should hold the thread for the first two or three stitches.
4. Then sew a straight seam with the stitches (1 to 4) adapted to the kind of job or the material. Shorter stitches for fine material, longer stitches for heavier material.

Straight Reverse Stitching

5. For brief use, move the lever to the right (for instant reverse or back-tack). When you release it, the machine automatically returns to forward stitching.
- 6-7. For prolonged sewing in reverse, turn the stitch length dial to between 1 and 4, red figures.

Removing the Material

8. To remove the material, first turn the flywheel towards you to raise the thread take-up lever to its highest position. Lift the presser foot lever (raise the foot). Pull out the material away from you and cut the thread with the thread cutter on the presser bar.
