[A River's Gifts](#) Patricia Newman,2023-08-01 Audisee eBooks with Audio combine professional narration and sentence highlighting for an engaging read aloud experience A mighty river A long history For thousands of years the Elwha river flowed north to the sea The river churned with salmon which helped feed bears otters and eagles The Lower Elwha Klallam Tribe known as the Strong People located in the Pacific Northwest were

grateful for the river's abundance. All that changed in the 1790s when strangers came who did not understand the river's gifts. The strangers built dams and the environmental consequences were disastrous. Sibert honoree Patricia Newman and award-winning illustrator Natasha Donovan join forces to tell the story of the Elwha, chronicling how the Strong People successfully fought to restore the river and their way of life. *A River's Gifts* Patricia Newman, 2023. There's more to a river than meets the eye. The story of the Elwha River in Washington state is one of both environmental harm and restoration involving advocacy, persistence, cooperation, and hope. *Tenacious Beasts* Christopher J. Preston, 2024-03-05. An inspiring look at wildlife species that are defying the odds and teaching important lessons about how to share a planet. First Honorable Mention The Rachel Carson Environment Book Award Winner of the 2024 High Plains Book Award Non-Fiction Category Finalist 2024 PROSE Awards Popular Science and Mathematics Category Included in The New Yorker's Best Books of 2023. So far, the news about wildlife is dire: more than 900 species have been wiped off the planet since industrialization. Against this bleak backdrop, however, there are also glimmers of hope and crucial lessons to be learned from animals that have defied global trends toward extinction: bears in Italy, bison in North America, whales in the Atlantic. These populations are back from the brink, some of them in numbers unimaginable in a century. How has this happened? What shifts in thinking did it demand? In crisp, transporting prose, Christopher Preston reveals the mysteries and challenges at the heart of these resurgences. Drawing on compelling personal stories from the researchers, Indigenous people, and activists who know the creatures best, Preston weaves together a gripping narrative of how some species are taking back vital ecological roles. Each section of the book—farms, prairies, rivers, forests, oceans—offers a philosophical shift in how humans ought to think about animals, passionately advocating for the changes in attitude necessary for wildlife recovery. *Tenacious Beasts* is quintessential nature writing for the Anthropocene, touching on different facets of ecological restoration: from Indigenous knowledge to rewilding practices. More important, perhaps, the book offers a road map and a measure of hope for a future in which humans and animals can once again coexist. **Restoring America's Rivers** Richard M. Robinson, 2025-07-02. The undamming and restoration of rivers is a major component of our broader environmental movement. There are ecological, economic, and social justice issues enveloped by initiatives involving river restorations, and it's time to focus our attention on these concerns. In this book, Richard M. Robinson reviews the removal of big concrete, big earthen, and low-head dams along North America's larger and smaller rivers. Chapters highlight issues and contradictions related to dam safety, dam removals, and river restoration. The resulting book provides key insights into the economics and ecology of environmental restoration, our water resource management, and environmental justice. **Resolving Water Conflicts Workbook** Lynette de Silva, Chris Maser, 2021-11-25. This book works to build trust, consensus, and capacity to enhance understanding through a water conflict management framework designed to bolster collaborative skills. Built on case studies, analysis, and hands-on real-life applications, it addresses issues of water insecurity of marginalized systems and communities, global water viability.
