Embryo Politics Thomas Banchoff, 2011-05-15 Since the first fertilization of a human egg in the laboratory in 1968 scientific and technological breakthroughs have raised ethical dilemmas and generated policy controversies on both sides of the Atlantic Embryo stem cell and cloning research have provoked impassioned political debate about their religious moral legal and practical implications National governments make rules that govern the creation destruction and use of embryos in the laboratory but they do so in profoundly different ways In **Embryo Politics** Thomas Banchoff provides a comprehensive overview of political struggles about embryo research during four decades in four countries the United States the United Kingdom Germany and France Banchoff's book the first of its kind demonstrates the impact of particular national histories and institutions on very different patterns of national governance Over time he argues partisan debate and religious secular polarization have come to overshadow ethical reflection and political deliberation on the moral status of the embryo and the promise of biomedical research Only by recovering a robust and public ethical debate will we be able to govern revolutionary life science technologies effectively and responsibly into the future

Religious Appeals in Power Politics Peter S.

Henne, 2023-10-15 **Religious Appeals in Power Politics** examines how states use or attempt to use confessional appeals to religious belief and conscience to advance political strategies and objectives Through case studies of the United States Saudi Arabia and Russia Peter S Henne demonstrates that religion although not as high profile or well funded a tool as economic sanctions or threats of military force remains a potent weapon in international relations Public policy analysis often minimizes the role of religion favoring military or economic matters as the important arenas of policy debate As Henne shows however at transformative moments in political history states turn to faith based appeals to integrate or fragment international coalitions Henne highlights Saudi Arabia's 1960s rivalry with Egypt the United States's post 9 11 leadership in the global war on terrorism and the Russian Federation's contemporary expansionism both to reveal the presence and power of calls for religious unity and to emphasize the uncertainty and anxiety such appeals can create **Religious Appeals in Power Politics** offers a bold corrective to those who consider religion as tangential to military or economic might

Morality Policies in Europe Christoph Knill, 2017-07-05 The regulation of issues like abortion euthanasia gun control same sex unions pornography prostitution drugs or gambling is commonly referred to a special class of so called morality policies The distinctive feature of these policies is that politics are shaped by conflicts over first principle When does life end When does it begin Is gambling drug consumption or prostitution inherently malignant The regulation of these value conflicts entails decisions about right or wrong and hence the validation of a particular set of basic values Yet there is still a remarkable lack of scholarly attention on morality policies in particular with regard to general implications for the study of public policy To stimulate further research in this area this book focuses on different concepts and theories of morality policy change in

The Routledge Handbook of Biopolitics Sergei Prozorov, Simona Rentea, 2016-08-05 The problematic of biopolitics has become increasingly important in the social sciences Inaugurated by Michel Foucault's genealogical research on the governance of sexuality crime and mental illness in modern Europe the research on biopolitics has developed into a broader interdisciplinary orientation addressing the rationalities of power over living beings in diverse spatial and temporal contexts The development of the research on biopolitics in recent years has been characterized by two tendencies the increasingly sophisticated theoretical engagement with the idea of power over and the government of life that both elaborated and challenged the Foucauldian canon e.g. the work of Giorgio Agamben Antonio Negri Roberto Esposito and Paolo Virno and the detailed and empirically rich investigation of the concrete aspects of the government of life in contemporary societies Unfortunately the two tendencies have often developed in isolation from each other resulting in the presence of at least two debates on biopolitics the historico-philosophical and the empirical one This Handbook brings these two debates together combining theoretical sophistication and empirical rigour The volume is divided into five sections While the first two deal with the history of the concept and contemporary theoretical debates on it the remaining three comprise the prime sites of contemporary interdisciplinary research on biopolitics economy security and technology Featuring previously unpublished articles by the leading scholars in the field this wide ranging and accessible companion will both serve as an introduction to the diverse research on biopolitics for undergraduate students and appeal to more advanced audiences interested in the current state of the art in biopolitics studies

Legitimizing Science Andreas Franzmann, Axel Jansen, Peter Münte, 2015-12-10 Since the founding in 1660 of the Royal Society London scientists engaging in experimental research have sought to establish a base for exploratory work in communities and their political institutions This connection between science and the national state has only grown stronger during the past two centuries Here historians sociologists and jurists discuss the history of that relationship since 1800 asking such key questions as how have scientists conceived of the national setting for their transnational work in the past and how do they situate their work in the context of globalization Taken together the essays reveal that while nineteenth century scientists in many countries felt they had to fight for public recognition of their work the twentieth century witnessed the national endorsement and planning of science With essays ranging from an analysis of speeches by nineteenth century German university presidents to the state of science in the context of European integration this book will appeal to anyone interested in the public and political role of science and its institutions in the past present and future

Religion in International Relations Theory Nukhet Sandal, Jonathan

Fox,2013-06-19 There is a growing realization among international relations scholars and practitioners that religion is a critical factor in global politics The Iranian Revolution the September 11 attacks the ethno religious conflicts such as the ones in the former Yugoslavia and Sri Lanka are among the many reasons for this increased focus on religion in international affairs The rise of religious political parties across the world ranging from the Christian Democrats in Europe to Bharatiya Janata Party in India similarly illustrated religion s heightened international profile Despite all this attention it is challenging to situate religion within a discipline which has been dominantly secular from its inception Only a few existent works have ventured to integrate religion into core international relations theories such as Classical Realism Neorealism Neoliberalism Constructivism and the English school This work is the first systematic attempt to comparatively assess the place of religion in the aforementioned theoretical strands of international relations with contemporary examples from around the world Written in an accessible and systematic fashion this book will be an important addition to the fields of both religion and international relations Nukhet A Sandal is Assistant Professor in the Political Science Department at Ohio University

Global Institutions Mark P. Lagon,Anthony Clark Arend,2014-10-15 What does human dignity mean and what role should it play in guiding the mission of international institutions In recent decades global institutions have proliferated from intergovernmental organizations to hybrid partnerships The specific missions of these institutions are varied but is there a common animating principle to inform their goals Presented as an integrated thematic analysis that transcends individual contributions Human Dignity and the Future of Global Institutions argues that the concept of human dignity can serve as this principle Human dignity consists of the agency of individuals to apply their gifts to thrive and requires social recognition of each person s inherent value and claim to equal access to opportunity Contributors examine how traditional and emerging institutions are already advancing human dignity and then identify strategies to make human dignity more central to the work of global institutions They explore traditional state created entities as well as emergent hybrid institutions and faith based organizations Concluding with a final section that lays out a path for a cross cultural dialogue on human dignity the book offers a framework to successfully achieve the transformation of global politics into service of the individual **The**
