**Future of Emergency Care** Institute of Medicine, Board on Health Care Services, The Future of Emergency Care Workshop Planning Group, 2007-06-09 In June 2006 the Institute of Medicine IOM Committee on the Future of Emergency Care in the U S Health System released a series of reports on the state of emergency care The reports *Emergency Medical Services at the Crossroads* *Hospital Based Emergency Care At the Breaking Point* and *Emergency Care for Children Growing Pains* identified a number of disturbing problems including overcrowded emergency departments a lack of coordination among emergency providers variability in the quality of care provided to patients workforce shortages lack of disaster preparedness a limited research base and shortcomings in the systems ability to care for pediatric patients These problems while apparent to those who work in the field are largely hidden from public view in part because popular fictional television programs frequently depict the emergency care system in fine shape Despite the lifesaving feats performed every day by emergency departments and ambulance services the nation s emergency medical system as a whole is overburdened underfunded and highly fragmented The IOM received funding from 14 organizations to conduct a series of dissemination workshops associated with the release of the 2006 reports on the future of emergency care Three one day regional dissemination workshops were conducted in Salt Lake City Utah September 7 2006 Chicago Illinois October 27 2006 and New Orleans Louisiana November 2 2006 Each of the workshops featured focused discussions in two issue areas The meeting in Salt Lake City focused on pediatric emergency care and care in rural areas in Chicago it was workforce issues and hospital efficiency and in New Orleans it was EMS issues and disaster preparedness A fourth capstone workshop held in Washington D C provided an

opportunity to engage congressional and other federal policy leaders in a discussion of emergency care issue Future of Emergency Care summarizes the proceedings of the workshops Each regional workshop began with an overview of the findings and recommendations from the three reports on the future of emergency care Findings and recommendations from those three reports are also summarized in this report

Committee on Ways and Means. Subcommittee on Health,2006      Regionalizing Emergency Care Institute of Medicine,Board on Health Care Services,2010-06-01 During medical emergencies hospital staff and emergency medical services EMS providers can face barriers in delivering the fastest and best possible care Overcrowded emergency rooms cannot care for patients as quickly as necessary and some may divert ambulances and turn away new patients outright In many states ambulance staff lacks the means to determine which hospitals can provide the best care to a patient Given this absence of knowledge they bring patients to the closest hospital In addition because emergency service providers from different companies compete with each other for patients and emergency care legislation varies from state to state it is difficult to establish the necessary local interstate and national communication and collaboration to create a more efficient system In 2006 the IOM recommended that the federal government implement a regionalized emergency care system to improve cooperation and overcome these challenges In a regionalized system local hospitals and EMS providers would coordinate their efforts so that patients would be brought to hospitals based on the hospitals capacity and expertise to best meet patients needs In September 2009 three years after making these recommendations the IOM held a workshop sponsored by the federal Emergency Care Coordination Center to assess the nation s progress toward regionalizing emergency care The workshop brought together policymakers and stakeholders including nurses EMS personnel hospital administrators and others involved in emergency care Participants identified successes and shortcomings in previous regionalization efforts examined the many factors involved in successfully implementing regionalization and discussed future challenges to regionalizing emergency care This document summarizes the workshop      Encyclopedia of Health Services Research Ross M.
