The Handbook of Business Essentials - Middle East Edition Randa Diab Bahman, Abrar Al Enzi & Bekir Emre Kurtulmus, 2024-03-29 The demands of today's fast paced world have made it increasingly challenging for educators in higher education Conventional teaching materials are continuously proving outdated due to their inflexibility and lack of consideration for diverse classrooms Educators have struggled to find concise yet thorough matter of fact content for teaching purposes The solution is usually a scattershot collection of information from various sources a particular difficulty for students whose English is a second language Due to language barriers innuendo and lingo these students can struggle with varying methods of information representation ultimately finding it difficult to adjust to the expected pace of study

Within this challenge lies an opportunity to consolidate individual research experience and efforts to unify course materials better suited to the aforementioned audience Therefore The Handbook of Business Essentials Middle East Edition provides a comprehensive look at the latest management theories and business strategies in a concise yet thorough easy to read context particularly adjusted for non native English speakers It also caters to the target student audience by providing real world examples from the Middle East which they can better understand and relate to The book includes a full Arabic translation as well as a glossary of translated terminology Business Under Crisis, Volume III Demetris Vrontis,Alkis Thrassou,Yaakov Weber,S. J. Smit,2007 Book CD To improve on an award winning book poses a major challenge to its authors The authors of this book took the challenge head on by conducting a major research study to determine what exactly the outcomes are that managers at different levels must deliver in contemporary organisations in South Africa and the rest of Africa The findings of this study which dealt with current and near future management issues as well as classical and contemporary thinking about management were used as the blueprint for the updating of this book After placing management in context the authors deal with the knowledge skills and dispositions required of managers to perform the management functions of planning organising leading and controlling in a volatile business world Examples of how the functions are applied in practice are cited throughout the book These examples refer mainly to South African organisations and situations that managers in South Africa and Africa have to deal with to create and sustain a competitive advantage for their organisations The book endeavours to break down the silo effect of seeing the management functions as separate activities This is done by continuously placing the management function at hand in a bigger context This enables learners of management to assess the implications of management decisions on different people processes systems and so on that make up the organisation
