Wagner, 2017-07-19 Excerpt from History Government and Geography of Carbon County Pennsylvania Our education to day lacks thoroughness Children are taught a great many things not necessary for them to know and they are not properly grounded in things that are essential The lawmakers the newspapers the business men and the general public are about unanimous on this point The opinion is general that children on leaving school have accumulated a wide variety of information which helps them but little if at all toward making a living or of being of service to any one Schools should be modified to overcome these Objections Many portions of the common branches do not in any vital way touch the life Of industry which most of the children will want to or will have to live It is possible to select the absolute essentials which form the basis of later school work as well as of practical life and make these the subject matter Of instruction SO much of what is unessential may be filtered out that time may be found to do well and thoroughly what is really necessary and yet leave time for the introduction of things which will fit children more directly for service We must not continue to turn children out of school who are utterly unequipped for their duties or who have only the vaguest notions of anything that is useful About the Publisher Forgotten Books publishes hundreds of thousands of rare and classic books Find more at www.forgottenbooks.com This book is a reproduction of an important historical work Forgotten Books uses state of the art technology to digitally

Burrowes, 2016-06-23 Excerpt from State Book of Pennsylvania Containing an Account of the Geography History Government Resources and Noted Citizens of the State With a Map of the State and of Each County Consisting as it almost wholly does Of a description of things and a statement of facts there is no room for invention and little for novelty in its composition In the scope and arrangement Of its materials however a considerable departure from the beaten track will be discovered The counties are not treated in alphabetical order but in classes accord ing to their form of surface productions and historical relation The strongly marked distinctive features of each group suggested this idea and a desire to aid the learner by a rational and easily remembered divi sion of the subject Of study induced its adoption TO carry out the design a small state map in addition to the separate county maps has been con structed with the classes Of counties marked upon it The advantage Of the change must be very small if it do not compensate the learner for the loss Of that easiness of reference which is the only sound reason that can be urged in favour of the alphabetical arrangement About the Publisher Forgotten Books publishes hundreds of thousands of rare and classic books Find more at www.forgottenbooks.com This book is a reproduction of an important historical work Forgotten Books uses state of the art technology to digitally reconstruct the work preserving the original format whilst repairing imperfections present in the aged copy In rare cases an imperfection in the original such as a blemish or missing page may be replicated in our edition We do however repair the vast majority of imperfections successfully any imperfections that remain are intentionally left to preserve the state of such historical works
