Geomagnetics for Aeronautical Safety Jean L. Rasson, Todor Delipetrov, 2007-09-17 Flying safely in aircraft implies the use of navigation instruments Among them the magnetic compass is still a first choice for orientation and it is compulsory in all aircraft In our increasingly sophisticated but fragile world of global navigation systems and gyroscopic sensors the compass is especially useful as a back up it is highly reliable and likely to survive in harsh electromagnetic aggressions or when all power supplies fail This book examines in detail how the science of geomagnetism is able to promote correct use of the magnetic compass for navigation A selected group of specialists met in Ohrid Macedonia to expose their approaches to the question Using techniques from Geology Instrument science Magnetism Chaos theory and Potential Fields applied to the Balkan region and surroundings they put together a roadmap to fully tackle the issue of measurement analysis mapping and forecasting the magnetic declination in support of aeronautical safety

Geomagnetic Observations and Models M. Manda, Monika Korte, 2010-12-10 This volume provides comprehensive and authoritative coverage of all the main areas linked to geomagnetic field observation from instrumentation to methodology on ground or near Earth Efforts are also focused on a 21st century e Science approach to open access to all geomagnetic data but also to the data preservation data discovery data rescue and capacity building Finally modeling magnetic fields with different internal origins with their variation in space and time is an attempt to draw together into one place the traditional work in producing models as IGRF or describing the magnetic anomalies
