mix and match colors This in turn brings those areas of the brain responsible for vision and fine motor skills into play and helps to keep these active and develop them further It is this aspect of coloring which is being seen more and more as especially valuable for older individuals as many believe that it can delay or even prevent the onset of dementia Coloring Allows You To Be Yourself There are no rules when it comes to coloring and your coloring book is just that your coloring book If you accidentally color the cat s rear leg green because you thought that it was part of the grass who is going to care Should you decide to make the sky pink does it really matter You can be as creative and experimental as you wish because this is your coloring book and yours alone When it comes to picking colors remember that the British based but American born artist James Whistler once said Mauve is just pink trying to be purple You may already be a convert to adult coloring in which case you will already know and appreciate its value This may however be a new venture for you and one which you are looking at for any one of several different reasons If this is something new for you then I urge you to try it out There is a reason why so many people are fired up about the world of adult coloring so jump on board and start to enjoy the benefits for yourself today
