Geophysical Hazards Minimizing Risk Maximizing Awareness International Year Of Planet Earth:

Geophysical Hazards Tom Beer, 2010-06-25 The International Year of Planet Earth IYPE was established as a means of raising worldwide public and political awareness of the vast though frequently under used potential the Earth Sciences possess for improving the quality of life of the peoples of the world and safeguarding Earth's rich and diverse environments. The International Year project was jointly initiated in 2000 by the International Union of Geological Sciences IUGS and the Earth Science Division of the United Nations Educational Scientific and Cultural Organisation UNESCO. IUGS which is a Non Governmental Organisation and UNESCO an Inter Governmental Organisation already shared a long record of productive cooperation in the natural sciences and their application to societal problems including the International Geoscience Programme IGCP now in its fourth decade. With its main goals of raising public awareness of and enhancing research in the Earth sciences on a global scale in both the developed and less developed countries of the world two operational programmes were demanded. In 2002 and 2003 the Series Editors together with Dr Ted Nield and Dr Henk Schalke all four being core members of the Management Team at that time drew up outlines of a Science and an Outreach Programme. In 2005 following the UN proclamation of 2008 as the United Nations International Year of Planet Earth the Year grew into a triennium 2007-2009.

Harsh K. Gupta Harsh K. Gupta, 2024-08-19 This book captures the essence of one of the most remarkable journeys of a professional who prevailed over numerous challenges and adverse situations that appeared before him from nowhere and how he emerged victorious to be hailed at a global forum of the American Geophysical Union in 2008. The author reflects upon the circumstances and times in post independent India that threw him out of the comforts of a well to do family into the real world. He traces back his entry into the field of earthquake science and dwells at length upon the scope and freedom it offered for innovative thinking in the field with limitless opportunities. Mishaps and accidents paved the way to remarkable discoveries and achievements including the creation of the world record for establishing and populating India's first permanent base station in Antarctica in a record time of one Antarctic summer despite having a near fatal helicopter crash on 4th day after reaching Antarctica. Stressing the need to live safely with earthquakes as their short term prediction is not a possibility yet the author advocates a two prong strategy of directly looking into the earthquake source region deep inside the earth and developing an earthquake resilient society simultaneously. He cites the success story of the Indian Tsunami Early Warning System that is operational in the Indian Ocean today. The book inspires young professionals with a flair for challenges and a burning desire to achieve results at any cost. This book provides important information in a nutshell about artificial water reservoir triggered earthquakes, India's building of the Dakshin Gangotri all weather station in Antarctica, Indian Ocean Tsunami warning set up, Low Temperature Thermal Desalination etc. The main objective of the book is to inspire a generation of young minds through a narration of scientific achievements that did not come easily to him. The aim is to tell them the difference between a reaction and a response to a given situation, the former being impulsive and

irrational and the latter responsible and rational **Global Change and Future Earth** Tom Beer, Jianping Li, Keith Alverson, 2018-10-18 Global Change and Future Earth is derived from the work of several programs of the International Union of Geodesy and Geophysics IUGG It demonstrates how multi and inter disciplinary research outputs from the geoscience community can be applied to tackle the physical and societal impacts of climate change and contribute to the Future Earth programme of the International Council for Science The volume brings together an international team of eminent researchers to provide authoritative reviews on the wide ranging ramifications of climate change spanning eight key themes planetary issues geodetic issues the Earth's fluid environment regions of the Earth urban environments food security and risk safety and security and climate change and global change Covering the challenges faced by urban and rural areas and in both developed and developing countries this volume provides an important resource for a global audience of graduate students and researchers from a broad range of disciplines as well as policy advisors and practitioners **Tsunami Events**

and Lessons Learned Y.A. Kontar, V. Santiago-Fandiño, T. Takahashi, 2013-11-04 This book is a collective effort by world experts bringing together assorted contributions presented during the Ocean Science Session OS 017 of the AOGS AGU Joint Assembly held in Singapore in 2012 the Asia Tsunami and Great East Japan Earthquake and Tsunami events The chapters cover assessment evaluation forecast and lessons learned as well as environmental and societal impacts of the latest tsunamis that occurred in the Indian Ocean in 2004 and the Pacific Ocean in Japan 2011 The book is aimed at experts scientists and decision makers seeking recent updated information knowledge and experiences to better understand quantify forecast and protect coastal water resources ecosystems communities and human settlements which are often affected by tsunamis **Geoscience for the Public Good and Global Development** Gregory R. Wessel, Jeffrey K.

Greenberg, 2016-05-18 Offers overview of applications of geosciences to sustainable development and geophilanthropic efforts worldwide and offers advice to guide creation of development projects Primacy of geologic input to all development activities is highlighted along with problems that are encountered and environmental issues that must be addressed

Landslides - Disaster Risk Reduction Kyoji Sassa, Philippo Canuti, 2008-11-07 This book documents the First World Landslide Forum which was jointly organized by the International Consortium on Landslides ICL eight UN organizations UNESCO WMO FAO UN ISDR UNU UNEP World Bank UNDP and four NGOs International Council for Science World Federation of Engineering Organizations Kyoto Univ and Japan Landslide Society in Tokyo in 2008 The material consists of four parts The Open Forum Progress of IPL Activities Four Thematic Lectures in the Plenary Symposium Global Landslide Risk Reduction Six Keynote Lectures in the Plenary session and the aims and overviews of eighteen parallel sessions dealing with various aspects necessary for landslide disaster risk reduction such as observations from space climate change and slope instability landslides threatening heritage sites the economic and social impact of landslides monitoring prediction and early warning and risk management strategies in urban area etc Thus it enables the reader to benefit from a wide range of

research intended to reduce risk due to landslide disasters as presented in the first global multi disciplinary meeting

Extreme Natural Events A.S. Unnikrishnan, Fredolin Tangang, Raymond J. Durrheim, 2022-10-12 This book presents the challenges of developing countries to understand and manage the risks of extreme natural events In the seventeen chapters presented it brings together scientific communities from Ghana India Indonesia Malaysia Philippines Sri Lanka South Africa and Venezuela to share their expertise in different aspects of managing extreme natural events particularly those related to climate It discusses how adaptation to these extreme natural events must be an integral part of national policy of the developing countries dealing with disaster mitigation and management **Observing the Volcano World** Carina J.
