**Authority in Byzantium** Pamela Armstrong, 2016-12-05 Authority is an important concept in Byzantine culture whose myriad modes of implementation helped maintain the existence of the Byzantine state across so many centuries binding together people from different ethnic groups in different spheres of life and activities Even though its significance to understanding the Byzantine world is so central it is nonetheless imperfectly understood The present volume brings together an international cast of scholars to explore this concept The contributions are divided into nine sections focusing on different aspects of authority the imperial authority of the state how it was transmitted from the top down from Constantinople to provincial towns how it dealt with marginal legal issues or good medical practice authority in the market place whether directly concerning over the counter issues such as coinage weights and measures or the wider concerns of the activities of foreign traders authority in the church such as the extent to which ecclesiastical authority was inherent or how constructs of religious authority ordered family life the authority of knowledge revealed through imperial patronage or

*Rhetoric in Byzantium* Elizabeth Jeffreys, 2017-07-05 Rhetoric in Byzantium explores the ways in which rhetoric functioned in Byzantine society as a tool for the effective communication of ideas and ideologies but at times also a barrier that inhibited the expression of real feelings and everyday realities and imposed a burden of decoding on outsiders After an introduction on the practical and textual background to Byzantine rhetoric the essays are grouped in five sections The first two deal with the basis of rhetoric in Byzantium and its public uses principally in imperial and ecclesiastical ceremonial The next sections look at how rhetoric affects the definition of literature in a Byzantine context and the aesthetic to be used in approaching Byzantine literature with reference to current critical approaches and specifically at the role of rhetoric in the writing of history does it only obscure the facts or does the rhetorical process itself provide information at other levels The final essays examine the interaction of the written word and pictorial representation and the question of whether real connections between rhetorical training and artistic production can be demonstrated

**History as Literature in Byzantium** Ruth Macrides, 2016-12-05 Although perceived since the sixteenth century as the most impressive literary achievement of Byzantine culture historical writing nevertheless remains little studied as literature Historical texts are still read first and foremost for nuggets of information as main sources for the reconstruction of the events of Byzantine history Whatever can be called literary in these works has been considered as external and detachable from the facts The classical tradition inherited by Byzantine writers the features that Byzantine authors imitated and absorbed are regarded as standing in the way of understanding the true meaning of the text and furthermore of contaminating the reliability of the history Chronicles whose language and style are anything but classicizing have been held in low esteem for they are seen as providing a mere chronological exposition of events This book presents a set of articles by an international cast of contributors deriving from papers delivered at the 40th annual Spring Symposium of Byzantine Studies They are concerned with historical and visual narratives that date from the sixth to the fourteenth century and aim to show that literary analyses and the study of pictorial devices far from being tangential to the study of historical texts are preliminary to their further study exposing the deeper structures and purposes of these texts
