Earthworks N. A. Trenter, 2001 Nothing can be built without some excavation and transfer of soil or rock from one part of a site to another and this makes earthworks the most common product of civil engineering operations Although normally seen as major structures such as earth fill dams or large highways or railway embankments the majority of earthworks are connected with minor civil works and building construction Whatever the type of work the principles are the same *Earthworks a guide* accumulates information on topics that are essential to earthworks engineering

Geotechnical Engineering for the Preservation of Monuments and Historic Sites III Renato Lancellotta, Carlo Viggiani, Alessandro Flora, Filomena de Silva, Lucia

Mele, 2022-06-15 The conservation of monuments and historic sites is one of the most challenging problems facing modern civilization It involves inextricable patterns factors belonging to different fields cultural humanistic social technical economical administrative and the requirements of safety and use appear to be or often are in conflict with the respect of the integrity of the monuments The complexity of the topic is such that a shared framework of reference is still lacking among art historians architects structural and geotechnical engineers The complexity of the subject is such that a shared frame of reference is still lacking among art historians architects architectural and geotechnical engineers And while there are exemplary cases of an integral approach to each building element with its static and architectural function as a material witness to the culture and construction techniques of the original historical period there are still examples of uncritical reliance on modern technology leading to the substitution from earlier structures to new ones preserving only the iconic look of the original monument Geotechnical Engineering for the Preservation of Monuments and Historic Sites III collects the contributions to the eponymous 3rd International ISSMGE TC301 Symposium Naples Italy 22-24 June 2022 The papers cover a wide range of topics which include Principles of conservation maintenance strategies case histories The knowledge investigations and monitoring Seismic risk site effects soil structure interaction Effects of urban development and tunnelling on built heritage Preservation of diffuse heritage soil instability subsidence environmental damages The present volume aims at geotechnical engineers and academics involved in the preservation of monuments and historic sites worldwide

Goal Oriented Learning Environments Horace Moo-Young, Timothy Fortner, 2003 E learning encompasses many things to many people Elliot Massie a leading e learning guru states that Online learning is not about taking a course and putting it on desktop It encompasses Combination of learning services and technology to provide high value integrated learning anytime and anyplace GOLE aims to create a virtual learning simulator that is capable of customizing the pedagogy to the learners learning style To properly design learn by doing scenarios the learning environment must balance the learning objectives with authenticity The key is to build a realistic environment which is complex enough to promote expectation failure and robust enough to support the learner at that point Two of the major learning objectives for a goal oriented learning environment are the application of facts and building specific skills The purpose of this research was to design develop implement and assess a Goal Oriented Learning Environment GOLE into the Civil and Environmental Engineering curriculum at Lehigh University Also to design develop implement and assess Internet based instructional systems into the CEE

curriculum To achieve these objectives a GOLE was implemented into two courses that were used as case studies in this research These case studies describe the instructional design method utilized and the assessment involved to evaluate the courses The instructional design method utilized nine steps Discuss Determine Decide Design Develop Implement Assessment Evaluation and Evolve The designing of GOLE focused on content delivery platform character development and story line In order to assess and evaluate the GOLE a series of five evaluations were created in order perform the analysis skill matrix course performance website evaluations and the DISC profile The data was then analyzed to determine what parts of the course were effective

Soil Mechanics for Unsaturated Soils Delwyn G. Fredlund,Hendry Rahardjo,1993-09-06 The principles and concepts for unsaturated soils are developed as extensions of saturated soils Addresses problems where soils have a matric suction or where pore water pressure is negative Covers theory measurement and use of the fundamental properties of unsaturated soils permeability shear strength and volume change Includes a significant amount of case studies

Novel Issues on Unsaturated Soil Mechanics and Rock Engineering Laureano R. Hoyos,John S. McCartney,2018-10-29 This volume discusses issues related to unsaturated soil mechanics and rock engineering based on technical papers focusing on two important topics in geotechnical engineering 1 the characterization of unsaturated soils and 2 the investigation of rock properties The research studies on unsaturated soils include the characterization techniques of the unsaturated soils The studies on rock properties include thermo hydro mechanical behavior of gypsum rock soft rocks capacity role of rock strength in blastability indirect methods to estimate rock strength and variations in isotope distributions in Permian rocks The two broad themes in this collection as summarized above are representative of local challenges facing geotechnical engineers in the Middle East but their contributions can also be extended to other regions of the world The volume is based on the best contributions to the 2nd GeoMEast International Congress and Exhibition on Sustainable Civil Infrastructures Egypt 2018 The official international congress of the Soil Structure Interaction Group in Egypt SSIGE

The Evolution of Geotech - 25 Years of Innovation Reginald Hammah,Thamer Yacoub,Alison McQuillan,John Curran,2021-11-23 This publication includes 82 technical papers presented at Rocscience International Conference RIC 2021 held online on April 20 and 21 2021 Rocscience created this event to bring geotechnical academics researchers and practitioners together to exchange ideas as part of celebrating 25 years of the company s existence The papers in these proceedings were from keynotes panel discussions and papers selected after careful review of over 100 technical submissions delivered at RIC 2021 The technical papers were grouped into sessions based on their subject areas The conference aimed to stimulate discussions that could help the industry work towards overcoming geotechnical

engineering limitations today It also sought to foster creative thinking that will advance the current states of the art and practice The keynote addresses panel discussions and technical presentations tried to examine geotechnical problems and situations from fresh perspectives RIC 2021 hopes that the proceedings will continue to enrich our thinking and contribute to achieving a critical mass of change in our practices and approaches We look forward to significant improvements in our industry
