**A Linguistic Introduction to German for the Non-linguist** Jonathan C. Busey, 2001 ABSTRACT This paper aims to complement other beginning German language courses at different levels it is set up both for students searching for easier ways to remember the basics and successfully complete what is required of them in the initial introductory sequence and for the curious student who seeks a deeper explanation of grammar thereby making a stronger foundation and long term success possible The target students range from beginners with no experience to those who are at more advanced levels and search for a reference documenting the basics to those have had an introductory course and desire a refresher The grammar is organized in a non cumulative fashion so that it is not necessary to read from beginning to end Rather it is meant to be used to look up the desired information one wants from each topic This is enhanced by copious hyperlinks in the electronic version and cross references in the printed version Reading the thesis through from beginning to end is designed to be beneficial to the students who have taken German before but is suggested to the beginning learner only in conjunction with another course which includes dialogues and exercises The main goal of this paper is to provide an additional resource to students interested in learning German at a deeper level than is required in a college level introductory sequence

**Fundamental Concepts in Phonology** Ken Lodge, 2009-06-01 This book is an investigation of the basic concepts of phonological theory In particular it is concerned with the concepts of sameness and difference each a sine qua non of classification It is assumed that all academic disciplines operate with these two basic concepts when classification is involved Since phonology is the area of linguistics that deals with the interface between the abstract system of native speaker knowledge and physical entities in the world the linguistic classification of those physical entities needs to be guided by clear and rigorously applied criteria for deciding what constitutes the same sound and what not During the development of modern linguistics over the past hundred years or so it has generally been assumed that the criteria for classification are to be found in a segmented version of the phonetic continuum of spoken language This is still largely the case today even though the system of native speaker knowledge of language is seen as a highly abstract mental representation of that knowledge This book questions the basis of such assumptions in particular segmentation abstractness monosystemicity and derivation

**Formulaic Language and Linguistic Change** Andreas Buerki, 2020-04-16 A substantial proportion of our everyday language is formulaic that is it consists of oft repeated chunks From pause fillers such as you know to phrases such as Many thanks Is this seat taken or strong tea they form a phenomenon central in language This important new book investigates formulaic language from the point of view of language change Employing a novel quantitative and data led approach it traces and analyses change in phraseology across 20th Century German as used in Switzerland Drawing on nearly 20 million words of textual evidence it shows that social and cultural change in the speech community is the predominant motivator of change though other factors are also at play The book demonstrates a close link between language change and the culture of the speech community arguing that this has repercussions for the study of language in general as well as the study of society and history
