Unified Integrative Medicine Dr. Nader Butto,2014-12-17 In recent years people seek alternative ways to solve health problems by increasing use of Integrative medicine The term integrative medicine by most definitions would include the idea and practice of adding complementary and alternative medicine CAM to range of therapeutic options in strictly conventional medical environments However the two approaches based on two different paradigms the biomedical model based upon the reductionism principle whereby mind and body are separated and reduces the illness to a disturbance in the biochemical process and therapy is intended to restore the biochemical processes to normal While most of the CAM based upon holistic principle that recognizes the body psyche and soul as an integrated and coherent whole However the psychological and spiritual realms remain mysterious and separated from the biomedical model This book presents a new paradigm whereby body and soul are two faces of the same reality like particle and wave in quantum physics Disease is a process that indicates a dissonance between the soul and the physical body due to specific psychological conflict or trauma that leads to an imbalance of vital energy of the cells The purpose of this new approach wants to go beyond the resolution of physical symptoms and the neurotic states The state of psycho physical well being and the interpersonal relations are no longer a goal but they become tools that enable the individual to complete the learning process to follow his path that leads him to grow and evolve towards the light Healing process is therefore a developmental process that leads the oppressive human mental barrier to spiritual liberation giving deep satisfaction and happiness to achieve the complete well being as it was defined by the WHO

practitioners are now insinuating themselves into the mainstream There are methods based on ancient or far eastern medicine as well as ones invented in the nineteenth and twentieth centuries Many are promoted as natural treatments What they have in common is that there is no hard evidence that any of them work Treatments like homeopathy acupuncture and chiropractic are widely available and considered reputable by many Ever more bizarre therapies from naturopathy to nutraceuticals ear candling to ergogenics are increasingly favoured Endorsed by celebrities and embraced by the middle classes alternative medicine s appeal is based on the spurious rediscovery of ancient wisdom and the supposedly benign quality of nature Surrounded by an aura of unquestioning respect and promoted through uncritical airtime and column inches alternative medicine has become a lifestyle choice Its global market is predicted to be worth 5 trillion by 2050 Suckers reveals how alternative medicine can jeopardise the health of those it claims to treat leaches resources from treatments of proven efficacy and is largely unaccountable and unregulated In short it is an industry that preys on human vulnerability and makes fools of us all Suckers is a calling to account of a social and intellectual fraud a bracing funny and popular take on a global delusion
