Embedded Entrepreneurship Institutional Innovation Competition:

Global Entrepreneurship, Institutions and Incentives Zoltán J. Ács, 2015-12-18 This book presents some of Zoltán J. Ács's most important contributions since the turn of the new millennium with a particular intellectual focus on knowledge spillover entrepreneurship. It studies the evolution of global entrepreneurship and pays attention to the role of institutions and the incentives they create for economic agents who become either productive or unproductive entrepreneurs. For productive entrepreneurs, those that create wealth for themselves and for society, the author offers a knowledge spillover theory of entrepreneurship as a new way to help understand the entrepreneurial ecosystem. For those that create wealth only for themselves, the author develops a theory of destructive entrepreneurship that undermines the entrepreneurial ecosystem. The book also presents an explanation of the role of philanthropy in reconstituting wealth to complete the circuits of capital in the theory of capitalist development. Finally, the author examines several public policy issues including immigration and technology transfer. This volume will be required reading for students and scholars of entrepreneurship, economics, and public policy.

Innovation, Science, and Institutional Change Jerald Hage, Marius Meeus, 2006-10-26 Innovation is central to the dynamics and success of organizations and society in the modern world, the process famously referred to by Schumpeter as gales of creative destruction. This ambitious and wide-ranging book makes the case for a new approach to the study of innovation. It is the editors' conviction that this approach must accomplish several objectives: it must recognise that innovation encompasses changes in organizations and society as well as products and processes; it must be genuinely interdisciplinary and include contributions from economics, sociology, management, and political science; it must be international to reflect both different patterns or systems of innovation and different research traditions; and it must reflect the fundamental changes taking place in science research and knowledge creation at all levels. To this end, they have gathered together a distinguished group of economists, sociologists, political scientists, and organization innovation and institutional theorists to both assess current research on innovation and to set out a new research agenda. This has been achieved through careful planning and development of the project and also through the ensuing structure of the book, which looks in turn at Product and Process Innovation, perhaps the best established focus of existing research on innovation; Scientific Research, assessing the changing character of basic research and science policy; Knowledge Dynamics in Context, encompassing organizational learning in all its aspects; and Institutional Change, an analysis of the institutional context that can shape, enable, and constrain innovation. This carefully integrated and wide-ranging book will be an ideal reference point for academics and researchers across the Social Sciences interested in all dimensions of innovation, be they in the field of Management Studies, Economics, Organization Studies, Sociology, Political Science, and Science and Technology Studies.

Enacting Regional Dynamics and Entrepreneurship Bengt Johannisson, Åsa Lindholm Dahlstrand, 2013-09-13 In present digital times the focus is on globalization and the dynamics and complexities that it creates However in spite of being dominated by technology the world remains populated by human beings practising a localized everyday life This contrast should challenge every researcher who is concerned with business and societal development and how that is contingent upon the institutional and cultural national context In this book Swedish researchers reflect upon entrepreneurship as a possible mediator between local and global economic and social concerns Using as a point of departure the tensions between a functional footloose rationale and a territorial rationale tied to place the authors provide different aspects on regional development in a globalised world A shared concern is the importance

of recognizing the many appearances of entrepreneurship that brings it beyond being an innovative force in the market The book thus presents different strategies and tactics for pursuing localized economic development and it also critically reviews adopted public support programmes and measures of the local business climate The conclusive message is that only by bridging the functional and territorial views will it be possible to sustain and possibly enhance economic and social life in local places as well as in our shared world This book was originally published as a special issue of European Planning Studies
