Library Technical Services Stacey Marien, 2020-08-15 Libraries are experiencing major changes concerning the role of technical services. Technical services librarians also are being challenged about their relevance and role sometimes revealed by a lack of understanding of the contribution technical services librarians make to building and curating library and archival collections. The threats are real: relocation from central facilities, the dramatic shift to electronic resources, budgetary constraints and outsourced processing. As a result, technical services departments are reinventing themselves to respond to these and similar challenges while embracing innovative methods and opportunities to advance librarianship in the twenty-first century. Library Technical Services provides case studies that highlight difficult realities yet embrace exciting opportunities such as space reclamation, evolving vendor partnerships, metadata retraining and managing personnel, special collections and distance education. Written for catalog and metadata librarians and managers of technical services units, this book will inspire and provide practical advice and examples for solving issues many libraries are facing today.

Fundamentals of Technical Services Management Sheila S. Intner, Peggy Johnson, 2008 The processes for acquiring, cataloging and preserving resources have undergone dramatic changes in the past decade and library technical services departments have had to evolve quickly in response. Often librarians asked to take on technical services management roles find themselves both underprepared and without guidance from their institutions. P 4 of cover
