Cracknell, 1991-08-12 Providing a full introduction to remote sensing for all environmental scientists this wide ranging and authoritative text assumes no prior knowledge of remote sensing yet covers the field in sufficient depth to be suitable also as a research Fundamentals of Cartography (Second Revised and Enlarged Edition) R.P. Misra, 2014-01-01 The first edition of manual Fundamentals of Cartography was published in 1969 by Prasaranga University of Mysore It was reprinted by the Concept Publishing Company New Delhi in While the book remained in currency the cartographic processes changed drastically when information technology brought a sea of change in the sources of information drafting of maps and printing processes Drawing maps by hand became obsolete surveying whether ground or aerial was no longer the only major source of information In view of these changes it became necessary to bring out a new edition Realising that unless one knows directions scales projections coordinates ground and air surveys one would fail to understand the proper use of modern information technology in the drawing the maps Thus the contents of 1969 edition are retained and new chapters have been added to update the book In Part II of the book a chapter on Remote Sensing and Satellite Imageries has been added and

Part V contains chapters on Computer Aided Cartography Geographic Information System GIS Land Information System LIS and Global Positioning System GPS People and Pixels National Research Council, Division of Behavioral and Social Sciences and Education, Board on Environmental Change and Society, Committee on the Human Dimensions of Global Change, 1998-05-21 Space based sensors are giving us an ever closer and more comprehensive look at the earth's surface they also have the potential to tell us about human activity. This volume examines the possibilities for using remote sensing technology to improve understanding of social processes and human environment interactions Examples include deforestation and regrowth in Brazil population environment interactions in Thailand ancient and modern rural development in Guatemala and urbanization in the United States as well as early warnings of famine and disease outbreaks The book also provides information on current sources of remotely sensed data and metadata and discusses what is involved in establishing effective collaborative efforts between scientists working with remote sensing technology and those working on social and environmental issues Fundamentals of GIS 2nd Edition Update with Integrated Lab Manual Michael N. DeMers, 2003 The Updated Second Edition of Fundamentals of Geographic Information Systems includes thirteen laboratory exercises integrated into the text itself The labs are linked to particular chapter where the concepts described in the reading can be practiced immediately in a laboratory setting The second edition of this well received text on principles of geographic information systems GIS continues the author's style of straight talk in its presentation. The writing is accessible and easy to follow Unlike most other texts this book covers GIS design and modeling reflecting the belief that modeling and analysis are at the heart of GIS This enables students to understand how to use a GIS and what it does **Hyperspectral Remote** Sensing of Vegetation, Second Edition, Four Volume Set Prasad S.
