Future Cities All That Matters:

Future Cities: All That Matters Camilla Ween, 2014-06-27 THE IDEA OF A WORLD OF 10 BILLION PEOPLE MOST OF WHOM WILL BE LIVING IN RAPIDLY EXPANDING CITIES CAN BE A TERRIFYING PROSPECT Add to that the effects of climate change and the scarcity of water energy and food and it sounds like a bleak future Without innovation and human ingenuity it might be but necessity is the mother of invention and Homo sapiens is a resourceful species By 2030 it is predicted that between 80 90% of the world s population will be living in cities Tackling the challenges will be complicated by pressure to develop solutions that are sustainable and include climate change mitigation measures Despite the difficulties some cities are already tackling the problems policies that are emerging to meet these challenges and highlights innovations that are currently being explored This book explains the issues that will face rapidly growing cities in the next 20 to 30 years and how building on sustainable practices already being introduced around the world cities can and will grow and flourish

Future: All That Matters Ziauddin Sardar, 2013-10-25 In Future All That Matters Ziauddin Sardar shows that thinking and speculating about the future has always been a part of human history but exploring the futures in a systematic and scientific way is a recent phenomenon What is known variously as futures studies futurology or foresight only emerged as a discipline during the last few decades The study of the future however is not only about predicting or forecasting the future which is always a perilous exercise It is also about appreciating the potentials and possibilities as well as risks and threats lurking over the horizon It can enable us both to avoid the dangers as well as shape a viable and desirable future This book explores the exciting field of futures studies and shows how knowledge of the future is acquired and put into practice We examine various methods for studying the future with the emphasis not so much on predicting specific events but on delineating alternative paths to the future We look at some celebrated readings of the future as well as case studies where exploration of the future has been used to shape policy and planning in businesses and communities international organisations and regional institutions and interest and lobby groups Finally the book suggests why and how in an increasingly complex uncertain and diverse world the study of the future can help people recover their agency and help them to create the world in which they wish to live This accessible and readable book will appeal both to students and general readers giving a
