The Future of Social Epistemology James H. Collier, 2015-12-02 The Future of Social Epistemology A Collective Vision sets an agenda for exploring the future of what we human beings reimagining our selves and our society want need and ought to know The book examines concretely practically and speculatively key ideas such as the public conduct of philosophy models for extending and distributing knowledge the interplay among individuals and groups risk taking and the welfare state and envisioning people and societies remade through the breakneck pace of scientific and technological change An international team of contributors offers a collective vision one that speaks to what they see unfolding and how to plan and conduct the dialogue and work leading to a knowable and desirable world The book describes and advances an intellectual agenda for the future of social epistemology

The Future of Social Epistemology James H. Collier, 2016 The Future of Social Epistemology A Collective Vision sets an agenda for exploring the future of what we human beings reimagining our selves and our society want need and ought to know The book examines concretely practically and speculatively key ideas such as the public conduct of philosophy models for extending and distributing knowledge the interplay among individuals and groups risk taking and the welfare state and envisioning people and societies remade through the breakneck pace of scientific and technological change An international team of contributors offers a collective vision one that speaks to what they see unfolding and how to plan and conduct the dialogue and work leading to a knowable and desirable world The book describes and advances an intellectual agenda for the future of social epistemology

Social Epistemology and Epistemic Agency Patrick J. Reider, 2016-07-15 The field of epistemology is undergoing significant changes Primary among these changes is an ever growing appreciation for the role social influences play on one's ability to acquire and assess knowledge claims Arguably social epistemology's greatest influence on traditional epistemology is its stance on decentralizing the epistemic agent In other words its practitioners have actively sought to dispel the claim that individuals can be solely responsible for the assessment acquisition dissemination and retention of knowledge This view opposes traditional epistemology which tends to focus on the individual's capacity to form and access knowledge claims independent of his or her relationship to society Social Epistemology and Epistemic Agency is an essential resource for academics and students who ask in what manner does society engender its members with the ability to act as epistemic agents what actions constitute epistemic agency and what type of beings can be epistemic agents

[The Social Production of Knowledge in a Neoliberal Age](#) Justin Cruickshank, Ross Abbinnett, 2022-04-04 Higher education exposes a key paradox of neoliberalism The project of neoliberalism was said to be that of rolling back the state to liberate individuals by replacing government bureaucracy with the free market Rather than have the market serve individuals however individuals were to serve the market The marketisation reforms in higher education which sought to reshape knowledge production with students investing in human capital and academics producing transferable research to make higher education of use to the economy

has resulted in extensive government bureaucracy and oppressive managerialist bureaucracy which is inefficient and expensive Neoliberalism has always had authoritarian aspects and these are now coming to bear on universities The state does not want critical and informed graduate citizens but a hollowed out public sphere defined by consumption willing servitude to the market and deference to state power Attempts to reshape universities with bureaucracy are now accompanied by a culture war attacking the production of critical knowledge The authors in this book explore these issues and the possibilities for resistance and progressive change *Collective Wisdom* Hélène Landemore,Jon Elster,2012-07-16 The contributors to this volume discuss and for the most part challenge whether many minds can be wiser than one *The Routledge Handbook of Social Epistemology* Miranda Fricker,Peter J. Graham,David Henderson,Nikolaj J.L.L. Pedersen,2019-07-19 Edited by an international team of leading scholars The Routledge Handbook of Social Epistemology is the first major reference work devoted to this growing field The Handbook s 46 chapters all appearing in print here for the first time and written by philosophers and social theorists from around the world are organized into eight main parts Historical Backgrounds The Epistemology of Testimony Disagreement Diversity and Relativism Science and Social Epistemology The Epistemology of Groups Feminist Epistemology The Epistemology of Democracy Further Horizons for Social Epistemology With lists of references after each chapter and a comprehensive index this volume will prove to be the definitive guide to the burgeoning interdisciplinary field of social epistemology **Knowing Humanity in the Social World** Francis X Remedios,Val Dusek,2018-01-09 This book examines Fuller s pioneering vision of social epistemology It focuses specifically on his work post 2000 which is founded in the changing conception of humanity and project into a post or trans human future Chapters treat especially Fuller s provocative response to the changing boundary conditions of the knower due to anticipated changes in humanity coming from the nanosciences neuroscience synthetic biology and computer technology and end on an interview with Fuller himself While Fuller s turn in this direction has invited at least as much criticism as his earlier work to him the result is an extended sense of the knower or humanity 2 0 which Fuller himself identifies with transhumanism The authors assess Fuller s work on the following issues Science and Technology Studies STS the university and intellectual life neo liberal political economy intelligent design Cosmism Gnosticism agent oriented epistemology proactionary vs precautionary principles and Welfare State 2 0 Interdisciplinarity and the Art of Human Connection Sharon Woodill,2025-08-07 This book examines interdisciplinarity through the lens of complexity theory arguing for an understanding of interdisciplinarity that embraces the wisdom of complexity and not just the idea Sharon Woodill critiques current interdisciplinary practices as often falling short of truly embracing complexity instead grafting complexity theory onto existing reductionist frameworks that lead to disconnection Drawing on principles of self organization and emergence this book re imagines the interdisciplinary process and integration that results It advocates for an epistemology of connection that prioritizes human relationships diverse perspectives and engagement with ambiguity in knowledge

practices It examines the concept of diversity as an example of interdisciplinarity grounded in a fully fledged complexity Throughout the book advocates for a shift from capture and control approaches to knowledge towards an understanding of knowing as a participatory emergent process It emphasizes the facilitation of new insights through deep engagement with the complexity of each other and the worlds we inhabit

The Epistemology of Disasters and Social Change Jordan Pascoe, Mitch Stripling, 2024-05-09 An earthquake in Mexico City spurs the rise of democracy A plague in South Africa lays the foundations for apartheid A terrorist attack on New York City triggers massive shifts in global security A global pandemic sets the stage for the largest civil rights protests in generations Beyond their physical impact disasters assault our certainty and shape a narrow space to alter the structure of what we believe That change can lead us toward disinformation and authoritarianism or it can lead us toward greater solidarity and human rights It all depends on the choices we make as we live through crisis on how in fact we choose to know each other The Epistemology of Disasters and Social Change draws on social epistemology disaster sociology psychology and feminist philosophy to investigate how disasters function as cauldrons of social transformation for good and ill We wrestle with how disasters change us moment by moment and provide new strategies to help these tragic events produce positive social transformation leading to a brighter future during this century of crisis

Disagreeing despite the Data David Apgar, 2024-08-19 Disagreeing despite the Data The Destruction of the Factual Commons examines the pressing problem of factual disagreement between social groups suggesting that the belief segregation underway in the United States may be irreversible David Apgar draws on the work of twentieth century philosophers of science and language especially Popper Wittgenstein and Davidson to identify three requirements for factual agreement to be possible at all a pervasive habit of checking assumptions densely connected communities and projects that straddle those communities The growing refusal to test assumptions and individual isolation can be remedied by critical thinking and community building Factual agreement between groups is impossible without shared projects or other meaningful interaction however and a large part of American society has insulated itself from the rest Without shared projects communities lose the ability to tell whether they agree or not regardless of the words they use Disagreeing despite the Data looks at the destructive effects of belief segregation with similar roots in several dissimilar developing countries on a path wide enough for richer ones like the United States to follow

Futures Thinking Christian Dayé, 2025-07-22 This book starts from the assumption that futures thinking is difficult yet of existential necessity We live in times where the future of humanity is at stake Thus it is important to understand where the images of the future that currently circulate in our cultures and societies come from This book is about two fields in the social sciences that explicitly concentrate on futures studies and the sociology of the future Informed by sociological theories it applies bibliometric methods to describe these two fields as epistemic tribes and territories After reflecting on the historical reasons for this bipartite academic institutionalization the book explores how the two fields could achieve a diligent division of labor that encourages forms of

futures thinking that speak to the societal and civilizational needs of our times

On Twenty-Five Years of Social Epistemology James H. Collier, 2016-03-16 This edited collection charts the development of and prospects for conceiving knowledge as a social phenomenon The origin aims and growth of the journal Social Epistemology founded in 1987 serves to anchor each of the book's contributions Each contribution offers a unique but related insight on current issues affecting the organization and production of knowledge In addition each contribution proposes necessary questions practices and frameworks relevant to the rapidly changing landscape of our conceptions of knowledge The book examines the commercialization of science the neoliberal university the status and conduct of philosophy the cultures of computer software and social networking the practical political and anthropological applications of social epistemology and how we come to define what human beings are and what activities human beings can and should sustain A diverse group of noted international scholars lends necessary original and challenging perspectives on our collective approach to knowledge This book was originally published as a special issue of Social Epistemology

Wilfrid Sellars, Idealism, and Realism Patrick Reider, 2016-11-17 Wilfrid Sellars Idealism and Realism is the first study of its kind to address a range of realist and idealist views inspired by psychological nominalism Bringing together premier analytic realists and distinguished defenders of German idealism it reveals why psychological nominalism is one of the most important theories of the mind to come out the 20th century The theory first put forward by Wilfrid Sellars argues that language is the only means by which humans can learn the types of socially shared practices that permit rationality Although wedded to important aspects of German idealism Sellars theory is couched in bold realist terms of the analytic tradition Those who are sympathetic to German idealism find this realist's appropriation of German idealism problematic Wilfrid Sellars Idealism and Realism thus creates a rare venue for realists and idealists to debate the epistemic outcome of the mental processes they both claim are essential to experience Their resulting discussion bridges the gap between analytic and continental philosophy In providing original and accessible chapters on psychological nominalism this volume raises themes that intersect with numerous disciplines the philosophy of mind philosophy of language epistemology and metaphysics It also provides clarity on arguably the best available account of why humans can reason be self aware know and act as agents

Rorty, Public Reason, and Modernity's Crisis of Critique Ivan Marquez, 2024-11-12 Starting with Richard Rorty's critique of reason this book discusses modernity's legitimation crisis in political discourse Rorty Public Reason and Modernity's Crisis of Critique explores the contemporary crisis of rational justification and collective will formation in our current political institutions and the public sphere arguing that there is an array of untapped rational resources that should be deployed to justify social political and economic views agendas and programs It also identifies limits to the powers of public reason to generate rational agreement and collective will formation Using a critical analysis of Rorty's non foundationalist perspective as a vehicle to study modernity's project of rational critique Ivan Marquez highlights both the strengths and promise and the weaknesses and limitations of liberal and

democratic societies especially within pluralistic socio cultural contexts and some possible ways to work within this space of possibilities and constraints Ultimately this book can be seen as elaborating a political epistemology view that argues for a redefinition of philosophy and defends a type of post metaphysical culture **The Routledge Handbook of Media**

Education Futures Post-Pandemic Yonty Friesem,Usha Raman,Igor Kanižaj,Grace Y. Choi,2022-09-13 This handbook showcases how educators and practitioners around the world adapted their routine media pedagogies to meet the challenges of the COVID 19 pandemic which often led to significant social economic and cultural hardships Combining an innovative mix of traditional chapters autoethnography case studies and dialogue within an intercultural framework the handbook focuses on the future of media education and provides a deeper understanding of the challenges and affordances of media education as we move forward Topics range from fighting disinformation how vulnerable communities coped with disadvantages using media transforming educational TV or YouTube to reach larger audiences supporting students wellbeing through various online strategies examining early childhood parents and media mentoring using digital tools reflecting on educators intersectionality on video platforms youth produced media to fight injustice teaching remotely and providing low tech solutions to address the digital divide search for solutions collaboratively using social media and many more Offering a unique and broad multicultural perspective on how we can learn from the challenges of addressing varied pedagogical issues that have arisen in the context of the pandemic this handbook will allow researchers educators practitioners institution leaders and graduate students to explore how media education evolved during 2020 and 2021 and how these experiences can shape the future direction of media education **Taking Conspiracy Theories Seriously** Matthew R. X.

Dentith,2018-11-16 The contributors to this volume argue that whilst there is a commonplace superstition conspiracy theories are examples of bad beliefs and that the kind of people who believe conspiracy theories are typically irrational many conspiracy theories are rational to believe the members of the Dewey Commission were right to say that the Moscow Trials of the 1930s were a sham Woodward and Bernstein were correct to think that Nixon was complicit in the conspiracy to deny any wrongdoing in the Watergate Hotel break in and if we either accept the terrorist events of 9 11 were committed by Al Qaeda or that the Bush Administration was responsible then it seems we are endorsing some theory about a conspiracy to commit an act of terror on American soil As such there is no reason to reject conspiracy theories sui generis This volume challenges the prima facie that conspiracy theories are irrational beliefs arguing that we should treat conspiracy theories and the phenomena of conspiracy theories seriously It presents fresh perspectives from the wider philosophical sociological and psychological community on what is becoming an issue of increasing relevance in our time *Understanding the Knowledge Society* Andrea Cerroni,2020-05-29 Complex knowledge and ideas are generated shared and accessed globally Andrea Cerroni turns to this knowledge society to offer a comprehensive social theory of its processes to bridge the gap between knowledge and democracy Drawing on a long term historical perspective Cerroni assembles a cultural matrix comprising

ancient myths on nature society and knowledge and modern myths of reductionism individualism and relativism to improve our contemporary sociological imagination **Epistemic Paternalism** Guy Axtell, Amiel Bernal, 2020-06-22 This volume considers forms of information manipulation and restriction in contemporary society It explores whether and when manipulation of the conditions of inquiry without the consent of those manipulated is morally or epistemically justified The contributors provide a wealth of examples of manipulation and debate whether epistemic paternalism is distinct from other forms of paternalism debated in political theory Special attention is given to medical practice for science communication and for research in science technology and society Some of the contributors argue that unconsenting interference with people's ability of inquire is consistent with and others that it is inconsistent with efforts to democratize knowledge and decision making These differences invite theoretical reflection regarding which goods are fundamental whether there is a clear or only a moving boundary between informing and instructing and whether manipulation of people's epistemic conditions amounts to a type of intellectual injustice The collection pays special attention to contemporary paternalistic practices in big data and scientific research as the way in which the flow of information or knowledge might be curtailed by the manipulations of a small body of experts or algorithms **Democratization and Struggles Against Injustice** Justo Serrano Zamora, 2021-07-07 In specialized literature as well as in the eyes of regular citizens social movements are often considered to be actors of democratization Among other things social movements criticize existing deficits in democratic systems they promote practices of deliberation and enact non hierarchical structures that challenge existing democratic institutions Very often these challenges emerge from the context of struggle against unjust situations involving social exclusion economic inequalities or the violation of fundamental rights Democratization and Struggles Against Injustice draws on the insights of one of the greatest American philosophers John Dewey as well as on some central intuitions of Frankfurt School Critical Theory to account for the connection between the democratic potential of social movements and their capacity to articulate injustice and promote just social relations Particularly it develops the idea that this double capacity can be explained by introduction of the pragmatist notion of experimental inquiry into the analysis of the epistemic practices of the mobilized By introducing pragmatist epistemology to the study of social movements Democratization and Struggles Against Injustice broadens the possibilities for their emancipatory potential **Feedback Loops** Andrew Wells Garnar, Ashley Shew, 2020-11-03 In a world of information technologies genetic engineering controversies about established science and the mysteries of quantum physics it is at once seemingly impossible and absolutely vital to find ways to make sense of how science technology and society connect In Feedback Loops Pragmatism about Science Technology editors Andrew Wells Garnar and Ashley Shew bring together original writing from philosophers and science and technology studies scholars to provide novel ways of rethinking the relationships among science technology education and society Through critiquing and exploring the work of philosopher of science and technology Joseph C Pitt the authors featured in this volume

investigate the complexities of contemporary technoscience writing on topics ranging from super computing to pedagogy engineering to biotechnology patents and scientific instruments to disability studies Taken together these chapters develop an argument about the necessity of using pragmatism to foster a more productive relationship among science technology and society
