Future Tense The Coming World Order:

The Coming New World Order Thomas J. Mueller, 2015-04-02 This book proposes a step by step blueprint for a better world There is a storm brewing on the horizon A new world order is coming based on all the trends and global pressures that is facing mankind today The question is who s world vision is going to prevail and lead us into the 21st century and beyond Will it be based on Man s vision and his world ruling government that has only produced war or God s vision and Christ s world ruling government that is guaranteed to produce lasting peace The outcome to this vital question and struggle will either bring on the Apocalypse or the prophesied Millennium It is our choice and we need to decide soon before we hit a point of no return Prophecy says the Kingdom of Man is going to face off with the Kingdom of God on the Plains of Megiddo in Northern Israel in the not too distant future for supremacy on earth if we don t heed the warnings and change our ways Our message therefore is simple Christ is returning shortly as King of Kings to establish a new political order His world ruling government of the Kingdom of God on earth His return can either be a forceful one or a peaceful one It is our decision Either way we need to decide soon and get ready for the Second Coming **Future** Gwynne Dyer, 2004 **The Realities**

of Reality - Part IV: The Reality Behind Achieving World Peace Fritz Dufour, MBA, DÉSS, 2020-04-05 This book is organized in seven chapters Chapter one looks at the origins and the causes of war The chapter argues that war is a consequence of how we as a species have evolved War has both endogenous and exogenous causes While the former depends on our biology and psychology the latter has to do primarily with international relations Chapter two makes the case for the paradoxical nature of war While war takes lives it is legitimate under certain circumstances For example armed humanitarian interventions are allowed to save lives among local populations at the expense of the oppressors by employing all necessary means ethical or not Chapter three asks if peace among nations is achievable which is the main theme of this book However it does not elaborate on the question entirely Instead it gives sort of a prelude of what will be discussed in the remaining of the book by talking about the concepts of world order and American hegemony arms race and peacebuilding Chapter four builds on three by looking at realism idealism and pacifism in international relations As to pacifism the chapter attempts to answer the question what was the most peaceful time in history Chapter five presents the elements of hope for world peace by considering the role played by the following 1 the United Nations 2 the North Atlantic Treaty Organization NATO 3 the Organization for Security and Cooperation in Europe OSCE 4 the non governmental organizations NGOs 5 the role of nuclear deterrence 6 globalization 7 transnationalism 8 diplomacy 9 sports 10 international cooperation in space exploration 11 the Nobel Prize and 12 the declining of war and violence in modern times On the other hand chapter six presents the opposite argument or the barriers to world peace using the following points 1 the proliferation of nuclear weapons 2 geoeconomics 3 terrorism 4 the global refugee crisis 5 the profitability of arms sales and 6 the profitability of wars It makes an interesting argument especially as to the profitability of wars by showing how the United States first emerged as an imperial and a world

power in the 1890s then as the only world's superpower after World War II Finally chapter seven takes a proactive approach by peering into the future of armed conflict which is likely to take place in new environments Cyberspace the littoral choke points near space and increasingly in expanding cities or slums War The chapter concludes with a discussion on the Doomsday Clock a concept stemmed from the uncertainty as to the future of mankind because of armed conflicts and which is a symbol that represents the likelihood of a man made global catastrophe

Rethinking the Principles of War Anthony McIvor, 2012-11-16 This new work features the fresh thinking of twenty eight leading authors from a variety of military and national security disciplines Following an introduction by Lt Gen James Dubik Commander I Corps U S Army and an opening essay titled State of the Question by Dr Colin Gray the anthology first considers the general question of An American Way of War Sections on operational art with writers addressing the issues in both conventional and small wars stability and reconstruction and intelligence complete the volume Among the well known contributors are Fred Kagan Ralph Peters Harlan Ullman and Milan Vego This collection of essays is the outcome of a seminar series sponsored by the Office of Force Transformation and the U S Navy to examine the future of warfare and the underlying principles of war and to educate future military strategists and leaders on these principles Footnotes index and a bibliographic essay make the work a useful tool for students of war and general readers alike

The Legitimate Use of Military Force Howard M. Hensel, 2016-03-03 Throughout human history scholars statesmen and military leaders have attempted to define what constitutes the legitimate use of armed force by one community against another Moreover if force is to be used what normative guidelines should govern the conduct of warfare Based upon the assumption that armed conflict is a human enterprise and therefore subject to human limitations the Western just war tradition represents an attempt to provide these guidelines Following on from the success of Hensel's earlier publication *The Law of Armed Conflict* this volume brings together an internationally recognized team of scholars to explore the philosophical and societal foundations of just war tradition It relates the principles of jus ad bellum to contemporary issues confronting the global community and explores the relationship between the principles of jus in bello and the various principles embodied in the customary law of armed conflict Applying an interdisciplinary approach to analyzing and assessing the links between just war and the norms of behaviour the book provides a valuable contribution to international law international relations and national security studies

Antiterrorism and Threat Response Ross Johnson, 2013-02-21 One of the single greatest challenges to security professionals in the 21st century is terrorism In the last several years we have heard a lot about the importance of preparing for terrorist attacks This book offers a way to prevent terrorist attacks Providing security managers with a clear and simple methodology to protect their organizations

Meditations on the Human Condition in an Imperial Age Irina V. Boca, 2012-10-12 The concept of empire contains features that are both irreducibly spectral and terrifyingly real With much of both aspects prevailing at

subliminal levels it is nearly impossible for the casual observer to think through the maze of contradictions and constitutive forces inherent in the imperial system In her latest work of nonfiction *Meditations on the Human Condition in an Imperial Age* author and political philosopher Irina V Boca uses her expertise and research to help readers analyze the presence of empire as an indelible contemporary political force This intricate work unravels the Gordian knot of imperial politics and allows the reader to consider overlapping concepts from multiple perspectives finally making it possible for the general audience to get all the facts From post Hegelian philosophy to political science and popular culture the author has identified the intricately woven forces of imperial politics and invites readers to reconsider any easy location of power and any clear cut path to resistance or liberation

All Rise Robert W. Fuller, 2010-09-07 By the author of the bestselling *Some bodies and Nobodies* *Overcoming the Abuse of Rank* Argues that rankism abuse of the power that comes with superior rank does serious damage to our private relationships and public institutions Details how to design social institutions that overcome rankism and protect human dignity Learn more at www.BreakingRanks.net In his groundbreaking book *Some bodies and Nobodies* Robert Fuller identified a form of domination that everyone has experienced but few dare to protest rankism abuse of the power inherent in rank to exploit and humiliate someone of lower rank It plays a role in just about every form of social oppression n racism sexism homophobia and religious intolerance all have a significant element of rankism in them Most everyone has felt the sting of rankism at the hands of a dictatorial boss a condescending teacher an arrogant doctor or an imperious bureaucrat But equally most everyone has inflicted it on someone of lower rank That we are all of us both victims and perpetrators of rankism mandates a novel multifaceted strategy for confronting it Fuller isn't proposing that we do away with rank without it organizations become dysfunctional He's not advocating an egalitarian society where all are equal in rank but rather a dignitarian one where all are equal in dignity a society in which rank holders are held accountable rankism is shunned and dignity is broadly protected In *All Rise* Fuller lays the groundwork for a dignitarian society by delineating the scope and impact of rankism and then shows how a dignitarian movement can defeat it by addressing issues such as What would workplaces schools health care organizations politics religion and international relations look like if they were to embody dignitarian values What policies could we develop to defend dignity in our various social institutions How can we embody these principles in our lives and create a culture of universal dignity *All Rise* offers hope and practical solutions for fashioning a world where human relationships are governed by respect and every person's right to dignity is affirmed

The Sovereignty Solution Anna Simmons, Joe McGraw, Duane Lauchengco, 2011-10-01 The *Sovereignty Solution* is not an Establishment national security strategy Instead it describes what the U S could actually do to restore order to the world without having to engage in either global policing or nation building Currently there is no coherent plan that addresses questions like If terrorists were to strike Chicago tomorrow what would we do When Chicago is burning whom would we target How would we respond There is nothing in place and no strategy on the horizon to either reassure the American

public or warn the world attack us and this is what you can expect In this book a Naval Postgraduate School professor and her Special Forces coauthors offer a radical yet commonsensical approach to recalibrating global security Their book discusses what the United States could actually do to restore order to the world without having to engage in either global policing or nation building Two tracks to their strategy are presented strengthening state responsibility abroad and strengthening the social fabric at home The authors goal is to provoke a serious debate that addresses the gaps and disconnects between what the United States says and what it does how it wants to be perceived and how it is perceived Without leaning left or right they hope to draw many people into the debate and force Washington to rethink what it sends service men and women abroad to do

Routledge Handbook of Conflict Response and Leadership in Africa Alpaslan Özerdem, Sinem Akgül-Açıkmeşe, Ian Liebenberg, 2021-09-14 This handbook explores the challenges and opportunities for leadership and conflict response in the context of Africa at several levels Leadership plays a vital role in affecting conflict response but is frequently only examined at the macro level of state government and international organizations This handbook addresses the need to explore challenges and opportunities for leadership at several levels macro global regional national meso NGOs religious groups academics and micro civil society organizations youth groups women s organizations Analysis from multiple levels provides a broader explanation of conflict dynamics and helps to fit localized conflict transformation approaches into wider national or regional structures The multidisciplinary essays presented in this volume encompass the psychological political and structural dimensions of conflict response and demonstrate how its success is fundamentally linked to the style of effectiveness of leadership among other factors The volume is divided into four thematic sections Part I The theory and dynamics of conflict response and leadership Part II Macro level leadership experiences in conflict response Part III Meso micro level leadership experiences in conflict response Part IV Recommendations for improved leadership in conflict response This book will be of much interest to students of conflict resolution peace studies African politics security studies and international relations in general

The Mess They Made Gwynne Dyer, 2010-02-05 As Iraq descends ever closer to civil war no one doubts that George W Bush s Iraq strategy has been an abysmal failure just as Gwynne Dyer argued it would be in both Ignorant Armies and Future Tense The question now is what will happen not just in Iraq but in the whole Middle East region once American troops are withdrawn In *The Mess They Made* Dyer predicts that the Middle East will go through the biggest shake up since the region was conquered and folded into the Ottoman Empire five centuries ago In his trademark vivid prose and in arguments as clear as his research is thorough Dyer brings his considerable knowledge and understanding of the region to bear on the issue of how widespread the meltdown in the Middle East will likely be In five

chapters Dyer points the way from present policies and events to likely future developments in Iraq Iran Afghanistan and in the various other countries of the region not least of which is nuclear armed Israel Seeking Sustainability in an Age of Complexity Graham Harris,2007-06-14 Seeking Sustainability in an Age of Complexity explains the difficulties of sustainability and why collapse can occur In the last twenty years the theory of complexity has been developed complex systems science CSS speaks to natural systems and particularly to ecological social and economic systems and their interaction Due to the growing concern over the huge changes occurring in the global environment such as climate change deforestation habitat fragmentation and loss of biodiversity Graham Harris sets out what has been learned in an attempt to understand the implications of these changes and suggests ways to move forward This book discusses a number of emerging tools for the management of unruly complexity which facilitate stronger regional dialogues about knowledge and values which will be of interest to ecologists sociologists economists natural resource managers and scientists in State and local governments and those involved in water and landscape management **Defence Diplomacy and National Security**

Strategy Ian Liebenberg,Dirk Kruijt,Shrikant Paranjpe,2020-04-20 The post cold war era presented security challenges that at one level are a continuation of the cold war era at another level these phenomena manifested in new forms Whether the issues of economics and trade transfer of technologies challenges of intervention or humanitarian crisis the countries of the South previously pejoratively labelled Third World or developing countries have continued to address these challenges within the framework of their capabilities and concerns The volume explores defence diplomacies national security challenges and strategies dynamics of diplomatic manoeuvres and strategic resource management of Latin American southern African and Asian countries Authority Malcolm Ramsey,2012-03-05 I admire and applaud the brave crusaders who try to influence through protests people with authority Environmental groups such as the David Suzuki Foundation Green Peace The Nature Conservancy and social justice groups namely the Occupy Movement bravely struggle to influence authority These are the true heroes in our society Numerous excellent documentaries like Leonardo Dicaprio s The Eleventh Hour and Al Gore s An Inconvenient Truth point out what will happen to our biosphere if we don t change course However when push comes to shove it s all very well to be informed about a problem but in today s world being informed is a useless exercise because individuals have no authority to do anything about it My thesis offers a possible solution by empowering individuals giving them full citizenship responsibility and ownership in these problems This authority would empower citizens to exercise their authority by demanding truth and expelling ineffectiveness Perhaps you ve watched such documentaries read books or attended lectures about our ancestors to gain a tiny understanding of what it would be like to live in a world where there is no law against manslaughter nonconsensual sex or genocide It s not hard to believe that the most dangerous cunning and cruel creature on the planet is not the shark but mankind Some say we are nature s knives put here to reduce the number of species on the planet We are not only the most dangerous predator on the planet but also the only predator of our own

species Our very success has come from this complicated survival strategy of killing our fellow man murder and having non consensual sex rape to select the most intelligent beauties to reproduce It s quite natural for the Serbian soldiers to kill the men of a village then lock up the women to be used as sex slaves Such practices were common for great warriors such as the Ottomans Genghis Khan and the standard among ancient as well as modern aggressors The best incentive to fight hard was the sex at the end of the battle Our political system is our only defense against our potential malevolence Politics gives us rules protecting ourselves from ourselves At the beginning of the third millennia the beautiful intelligent people who occupy the biosphere of this planet the end product of thousands of generations of manslaughter and nonconsensual sex are responsible for maintaining this law and order We know if we work together we can save the biosphere and in so doing save thousands of future generations of our own species The solution to a stable world is inevitable Are you ready **State**

Crime Dawn Rothe,Christopher W. Mullins,2011 Through a collection of essays by leading scholars in the field State Crime offers a set of cases exemplifying state criminality along with various methods for controlling governmental transgressions

Islamophobia and the West Imbesat Daudi,2022-10-21 This book provides an engaging and insightful look into the definitions discourse and experiences of Islamophobia and its steady rise since 9 11 It analyses concepts and binaries that are drawn around discussions on civilization religious dogma violence and race Is there a link between Islam and violence Why does the West feel threatened by it The author critically examines these questions and the birth of hate politics which packages hate in a marketable format and often demonizes victims It also looks at the role of the media in the West in perpetuating stereotypes and its consequences and the nature of war reportage in Islamic countries while deconstructing the narrative of the clash of civilizations Topical and lucid this book is a must read for students and scholars of sociology international relations peace and conflict studies political science Islamic studies and for other readers interested in these topics **1-2 Thessalonians (Baker Exegetical Commentary on the New Testament)** Jeffrey A.
