Abstract. The qualitative study, which involved a multiple case study design, focused on the issues surrounding the readiness of teachers to implement the competency-based O-Level Geography Syllabus 4022 in the Zimbabwe secondary school system. In adopting a multiple case study design, the research sought to solicit the opinions of all Geography teachers in the Kwekwe district of Zimbabwe on their readiness to implement the competency-based O-Level Geography Syllabus 4022. A technique involving an analysis of primary documents published by MoPSE was done, and ten in-depth interviews with Geography teachers drawn from two secondary schools and two Focus Group Discussions (FDGs) from the same schools were adopted to generate data. The study established that the updated O-Level Geography Syllabus 4022 was introduced without enough consideration of the readiness of teachers for its implementation. It also emerged from the study that the breadth and depth of the issues surrounding teacher readiness to implement an updated syllabus require action to be taken from several fronts to ensure that the subject community is ready for its rapid delivery. Finally, the research paper recommends massive advocacy and sensitisation of O-Level Geography teachers who are at the helm of the user system to allow for effective delivery of the O-Level Geography Syllabus 4022 in the secondary school sector in Zimbabwe.

1. Introduction

The introduction of the competency-based curriculum in Zimbabwe posed a repertoire of challenges as classroom practitioners grappled with coming to terms with the underlying assumptions, goals, content, and principles that guide the operation of the new practice in both the primary and secondary schools system. Thus, most of the world's knowledge societies considering adopting reform initiatives in their education systems have primarily focused on holistic and integrated professional and pedagogical training concepts as a step toward

Geography Sylabus For Ordinary Level In Zimbabwe:

Education and Development in Zimbabwe Edward Shizha, Michael T. Kariwo, 2012-01-01 The book represents a contribution to policy formulation and design in an increasingly knowledge economy in Zimbabwe. It challenges scholars to think about the role of education, its funding, and the egalitarian approach to widening access to education. The nexus between education, democracy, and policy change is a complex one. The book provides an illuminating account of the constantly evolving notions of national identity, language, and citizenship from the Zimbabwean experience. The book discusses educational successes and challenges by examining the ideological effects of social, political, and economic considerations on Zimbabwe's colonial and postcolonial education. Currently, literature on current educational challenges in Zimbabwe is lacking, and there is very little published material on these ideological effects on educational development in Zimbabwe. This book is likely to be one of the first on the impact of social, political, and economic meltdown on education. The book is targeted at local and international academics and scholars of history of education and comparative education, scholars of international education and development, undergraduate and graduate students, and professors who are interested in educational development in Africa, particularly Zimbabwe. Notwithstanding, the book is a valuable resource to policy makers, educational administrators, and researchers, and the wider community. Shizha and Kariwo's book is an important and illuminating addition on the effects of social, political, and economic trajectories on education and development in Zimbabwe. It critically analyses the crucial specifics of the Zimbabwean situation by providing an in-depth discourse on education at this historical juncture. The book offers new insights that may be useful for an understanding of not only the Zimbabwean case but also education in other African countries. Rosemary Gordon, Senior Lecturer in Educational Foundations, University of Zimbabwe. Ranging in temporal scope from the colonial era and its elitist legacy through the golden era of populist universal elementary education to the disarray of contemporary socioeconomic crisis, covering elementary through higher education and touching thematically on everything from the pernicious effects of social adjustment programmes through the local deprofessionalization of teaching, this text provides a comprehensive, wide-ranging and yet carefully detailed account of education in Zimbabwe. This engagingly written portrayal will prove illuminating not only to readers interested in Zimbabwe's education specifically but more widely to all who are interested in how the sociopolitical shapes education, how ideology, policy, international pressures, economic factors, and shifts in values collectively forge the historical and contemporary character of a country's education. New Leaders, New Dawns? Chris Brown, David Moore, Blair Rutherford, 2022-06-17 In late 2017 and early 2018 South Africa and Zimbabwe both experienced rapid and unexpected political transitions In Zimbabwe Robert Mugabe the only leader the country had ever known was replaced in a soft coup by his erstwhile vice president Emmerson Mnangagwa Over a twelve day period in February 2018 South African president Jacob Zuma was prematurely forced from office by his former deputy president Cyril Ramaphosa The widespread popular rejoicing that accompanied their arrival compounded the shock of these sudden transitions *New Leaders New Dawns* explores these political transitions and the way they were received Contributors consider how the former liberation heroes Mugabe and Zuma could have fallen so low the underlying reasons for their ouster what happened to their liberation movements turned ruling parties and perhaps most importantly what the rise to power of Ramaphosa and Mnangagwa foreshadowed Bringing together fourteen leading international scholars of southern Africa and adopting a political economy framework this volume argues that the changes in leadership are welcome but insufficient While the time had come for Zuma and Mugabe to go there is little in the personal histories or early policy actions of Ramaphosa and Mnangagwa that suggests they will be capable of addressing the profound social economic and political problems both countries face *New Leaders New Dawns* reveals that despite what these new leaders may have promised a new dawn has not yet arrived in southern Africa
