## **George And Sam Two Boys One Family And Autism:**

**George & Sam** Charlotte Moore, 2013-10-08 For the parents families and friends of the 1 in 250 autistic children born annually in the United States George and Sam provides a unique look into the life of the autistic child Charlotte Moore has three children George Sam and Jake George and Sam are autistic George and Sam takes the reader from the births of each of the two boys along the painstaking path to diagnosis interventions schooling and more She writes powerfully about her family and her sons and allows readers to see the boys behind the label of autism Their often puzzling behavior unusual food aversions and the different ways that autism effects George and Sam lend deeper insight into this confounding disorder George and Sam emerge from her narrative as distinct wonderful and at times frustrating children who both are autistic through and through Moore does not feel the need to search for cause or cure but simply to find the best ways to help her sons She conveys to readers what autism is and isn't what therapies have worked and what hasn't been effective and paints a moving memorable portrait life with her boys Charlotte Moore is a writer and journalist who lives in Sussex England with her three sons She is the author of four novels and three children's book For two years she wrote a highly acclaimed column in the Guardian called Mind the Gap about life with George and Sam She is a contributor to many publications *Motherhood*

*Memoirs: Mothers Creating/Writing Lives* Justine Dymond, 2013-07-01 The authors in this collection examine and critique motherhood memoir alongside the texts of their own lives while seeking to transform mothering practice highlighting revolutionary praxis within books or when none is available creating new visions for social change Many essays interrogate the tensions of maternal narrative the negotiation of the historical location of writer and readers narrative and linguistic constraints and the slippery ground of memory as well as the borders constructed between the objective scholar and the reader who engages with and identifies with texts through her intellect and her emotional being *Chasing the Intact Mind*

Amy S. F. Lutz, 2023-09-20 In *Chasing the Intact Mind* Amy Lutz traces the history of the intact mind concept explaining how it influences current disability policy and practice in the United States Lutz describes how we got to this moment where the severely autistic are elided out of public discourse and the intensive disability specific supports they need defunded or closed altogether Lutz argues that focusing on the intact mind and marginalizing those with severe disability reproduces historic patterns of discrimination that yoked human worth to intelligence and that it is only by making space for the impaired mind that we will be able to resolve these ongoing clashes as well as even larger questions of personhood dependency and care

Essential Clinical Guide to Understanding and Treating Autism Fred R. Volkmar, Lisa A. Wiesner, 2017-07-25 Coauthored by the premier expert on autism in the United States and an experienced academic and practicing pediatrician this volume provides concise and practical information based on the most up to date research and clinical experience for primary care givers around the world Showing clinicians how to most effectively use evidence based techniques this invaluable guide offers primary care providers access to expert current research and practice guidelines allowing them to confidently support

children who present with symptoms of autism      A Practical Guide to Autism Fred R. Volkmar, Lisa A. Wiesner, 2009-05-18 Autism is in the public spotlight now more than ever as new research and information appears almost daily. Although in many ways this is a positive development, it also presents challenges to families and practitioners who want to keep up with the latest developments and are left to sift through new information by themselves to see what is credible and relevant for them. Each of us needs a personal research assistant who can determine which information we need to pay attention to and let us know how it might affect our daily work and the children we are living with or serve. Since we each don't have our own research assistants on staff, I am delighted to recommend this wonderful book by Fred Volkmar and Lisa Wiesner. Both of these talented professional leaders have combined their scientific skills and understanding of the field with great practical experience and ideas about how research can be translated into clinical practice. The result is a book that provides the best and most comprehensive information about recent scientific developments and a splendid practical guide for how they are being implemented and what we are learning in the process. The issues are presented in all of their complexity but translated into language that is clear, direct, and easy to follow. The format also lends itself to understanding the complex issues and their implications through excellent charts, question and answer sections, and chapters that vary from describing diagnostic issues to stating very specifically how to expand and evaluate the services one is receiving. The comprehensive references and lists of additional resources also add greatly to the overall package. As a professional dedicated to understanding scientific advances and helping families and teachers to utilize them most effectively, I am very pleased to have an ally like this book available. I am very grateful to the authors for providing a very credible, practical, and relevant addition to our field to help the many advocates and family practitioners to better understand the exciting new developments and how they can be implemented in our day-to-day work. Those taking the time to read through this superb volume will find it time well spent that pays back dividends in many different ways.

FOREWORD by Gary B. Mesibov, Ph.D., Professor and Director of TEACCH Treatment and Education of Autistic and Related Communication Handicapped Children, University of North Carolina at Chapel Hill      Autism and Talent Francesca Happé, Uta Frith, 2010-03-18 Originating from a theme issue first published in *Philosophical transactions of the Royal Society B Biological sciences*      Unexpected Alison Piepmeier, 2021-02-23 What prenatal tests and Down syndrome reveal about our reproductive choices. When Alison Piepmeier, scholar of feminism and disability studies and mother of Maybelle, an eight-year-old girl with Down syndrome, died of cancer in August 2016, she left behind an important unfinished manuscript about motherhood, prenatal testing, and disability. In *Unexpected*, George Estreich and Rachel Adams pick up where she left off, honoring the important research of their friend and colleague as well as adding new perspectives to her work. Based on interviews with parents of children with Down syndrome as well as women who terminated their pregnancies because their fetus was identified as having the condition, *Unexpected* paints an intimate, nuanced picture of reproductive choice in today's world. Piepmeier takes us inside her own daughter's life, showing how Down

syndrome is misunderstood stigmatized and condemned particularly in the context of prenatal testing At a time when medical technology is rapidly advancing Unexpected provides a much needed perspective on our complex and frequently troubling understanding of Down syndrome Autistic Intelligence Douglas W. Maynard, Jason Turowetz, 2022-05-25 As autism has become a widely prevalent diagnosis we have grown increasingly desperate to understand it Whether through baseless blame on vaccination or struggles to determine the potential genetic origins of autism Americans have devoted a great deal of thought to what autism is and where it comes from In Autistic Intelligence Douglas Maynard and Jason Turowetz focus on a different origin of autism the diagnostic process By turning to diagnosis they ask us to begin with the basic questions of what norms we measure autistic behavior against why we understand autistic behavior as disordered and how we go about assigning that disorder to particular people The authors take a close look at a clinic in which children are assessed for and diagnosed with autism They spent hours in assessment evaluations with psychologists pediatricians parents and children and the resulting data enabled them to make plain the systems language and categories that clinicians rely upon when making their assessments Those diagnostic tools determine the kind of information doctors can gather about children and indeed those assessments affect how children act Autism is not a stable category they show but the result of an interpretive act And in the process of diagnosing children with autism they argue we miss all of the unique contributions they make the world around them **Library Journal** ,2006 *Exceptional Child* Eileen K.
