The Moderns Steven Heller, Greg D'Onofrio, 2017-09-19 In *The Moderns* we meet the men and women who invented and shaped Midcentury Modern graphic design in America. The book is made up of generously illustrated profiles, many based on interviews of more than 60 designers whose magazine book and record covers, advertisements and package designs, posters and other projects created the visual aesthetics of postwar modernity. Some were migrants from Europe; others were homegrown. All were intoxicated by elemental typography, primary colors, photography and geometric or biomorphic forms. Some are well known; others are honored in this volume for the first time and together they comprised a movement that changed our design world.

Design New York 2004 Steven W. Kroeter, 2003

Dwell, 2006-02 At *Dwell* we're staging a minor revolution. We think that it's possible to live in a house or apartment by a bold modern architect, to own furniture and products that are exceptionally well designed and still be a regular human being. We think that good design is an integral part of real life. And that real life has been conspicuous by its absence in most design and architecture magazines.

Architecture, 2003-07

Inside Prefab Deborah Schneiderman, 2012 As an inherently sustainable and affordable building method, prefabrication has enjoyed a revival in recent years, attracting clients and architects alike. Low construction costs, efficiency and sustainability make prefabrication an attractive solution for contemporary interior designers. Off-site production for interior design elements has been the norm for centuries, from the first Asian paper screens to the packaged kitchens of the mid-twentieth century, but it has rarely been the topic of serious discussion. In *Inside Prefab*, author Deborah Schneiderman offers a fascinating history of prefabricated interior design, followed by twenty-four contemporary case studies. The richly illustrated examples in this book range from interior walls, kitchens, bathrooms, furniture and offices to complete prefabricated house interiors. This first book-length discussion and showcase of the prefabricated interior environment includes projects by established architects such as Shigeru Ban, Atelier Tekuto and Greg Lynn, as well as up-and-coming firms.

The Housing Project Gaia Caramellino, Stéphanie Dadour, 2020-03-03 Throughout the twentieth century, housing displays have proven to be a singular genre of architectural and design exhibitions. By crossing geographies and adopting multiple scales of observation, from domestic space to urban visions, this volume investigates a set of unexplored events devoted to housing and dwelling, organised by technical, professional, cultural or governmental institutions, from the interwar years to the Cold War. The book offers a first critical assessment of twentieth-century housing exhibits and explores the role of exhibitions in the codification of notions of domesticity, social models, policies and architectural and urban discourse. At the intersection of housing studies and the history of exhibitions, *The Housing Project* not only offers a novel angle on architectural history but also enriches scholarly perspectives in urban studies, cultural and media history, design and consumption studies.
