Back to School Activities:

For back-to-school to be so important for students to get to know each other and to feel as part of the class. The first week of school, I always focus on team building and SEL activities. I also use Workshop books in my classroom. I have linked my Getting Started with Math Workshop in case you are looking to use it as well.

Turning Average Instruction Into Great Instruction John O'Connor,2009-01-16 Turning Average

Instruction into Great Instruction details a clear and concise approach to school improvement focusing school leaders on the critical factor that has the greatest impact on student achievement classroom instruction Decades of research demonstrate

that what happens between teachers and students in our nation's classrooms has the greatest impact on how well those students learn. The current trend in school reform is to tackle all aspects of a school in order to improve student achievement, forcing school leaders to attempt to focus on the school culture, use of materials, community relations, teachers' pre-service training, the school's physical design, classroom decorations, and instruction. Unfortunately, such a wide scope leads to a lack of focus among school staff. With his singular focus on classroom instruction, what O'Connor suggests is an antithesis to that approach. School leaders will develop a common understanding of the high-impact instructional components that should be seen in every classroom. O'Connor maps out how school leaders can align all personnel to systematically build training support and monitoring mechanisms that ensure that effective instruction becomes part of every classroom routine.
