The Soviet Partisan Movement, 1941-1944 Edgar M. Howell, 1956 The purpose of this text is to provide the Army with a factual account of the organization and operations of the Soviet resistance movement behind the German forces on the Eastern Front during World War II This movement offers a particularly valuable case study for it can be viewed both in relation to the German occupation in the Soviet Union and to the offensive and defensive operations of the Wehrmacht and the Red Army The scope of the study includes an over all picture of a quasi military organization in relation to a larger conflict between two regular armies It is not a study in partisan tactics nor is it intended to be German measures taken to combat the partisan movement are sketched in but the story in large part remains that of an organization and how it operated The German planning for the invasion of Russia is treated at some length because many of the circumstances which favored the rise and development of the movement had their bases in errors the Germans made in their initial planning The operations of the Wehrmacht and the Red Army are likewise described in considerable detail as the backdrop against which the operations of the partisan units are projected Because of the lack of reliable Soviet sources the story has been told much as the Germans recorded it German documents written during the course of World War II constitute the principal sources but many survivors who had experience in Russia have made important contributions based upon their personal experience

**From Defeat to Victory** Charles J. Dick, 2016-11-04 By the summer of 1944 the war in Europe had reached a critical point Both the western Allies and the Soviets possessed the initiative and forces capable of mounting strategic offensives against the German enemy Writing a study of operations on first the Western then the Eastern Front respected military analyst C J Dick provides a uniquely informative comparison of the different war fighting doctrines brought to bear by the Allies and the Red Army in contemporaneous campaigns His book offers rare insights into the strengths and weaknesses of generalship on both fronts In volume 2 From Defeat to Victory Dick turns to the Eastern Front where battle lines stretched from the Baltic to the Black Sea nearly 1 500 miles to the Allies 600 and the Soviet armies and engagements dwarfed in scale those in the West More importantly they reflected a war fighting philosophy significantly different than the Allies which in turn produced different military operations The Soviets were masters of deception and surprise a concept called maskirovka that was an essential part of every military operation The Soviets were committed to highly mobile and high tempo offensives They massed troops in heavy concentrations to achieve a breakthrough that would quickly set conditions for decisive operational maneuvers they were relentless in their will to destroy the enemy's forces and unlike their counterparts in the West were willing to contend with an enormous amount of casualties Dick's analysis shows us how the Red Army largely free of the political problems that constrained the Allies was able to develop more radical operational ideas and implement them with a daring and ruthlessness impossible for the armies of democratic states From Defeat to Victory also offers a critical lesson in the enduring importance of finding inculcating and implementing operational and tactical doctrine that fits the

aftermath In doing so this new military history provides a more complex and nuanced understanding of Spain's most intense period of wartime cultural mobilization between the years 1936 to 1944 and challenges traditional political accounts of the period

*Targeting Civilians in War* Alexander B. Downes, 2011-05-15 Accidental harm to civilians in warfare often becomes an occasion for public outrage from citizens of both the victimized and the victimizing nation In this vitally important book on a topic of acute concern for anyone interested in military strategy international security or human rights Alexander B Downes reminds readers that democratic and authoritarian governments alike will sometimes deliberately kill large numbers of civilians as a matter of military strategy What leads governments to make such a choice Downes examines several historical cases British counterinsurgency tactics during the Boer War the starvation blockade used by the

Allies against Germany in World War I Axis and Allied bombing campaigns in World War II and ethnic cleansing in the Palestine War He concludes that governments decide to target civilian populations for two main reasons desperation to reduce their own military casualties or avert defeat or a desire to seize and annex enemy territory When a state's military fortunes take a turn for the worse he finds civilians are more likely to be declared legitimate targets to coerce the enemy state to give up When territorial conquest and annexation are the aims of warfare the population of the disputed land is viewed as a threat and the aggressor state may target those civilians to remove them Democracies historically have proven especially likely to target civilians in desperate circumstances In *Targeting Civilians in War* Downes explores several major recent conflicts including the 1991 Persian Gulf War and the American led invasion of Iraq in 2003 Civilian casualties occurred in each campaign but they were not the aim of military action In these cases Downes maintains the achievement of quick and decisive victories against overmatched foes allowed democracies to win without abandoning their normative beliefs by intentionally targeting civilians Whether such restraint can be guaranteed in future conflicts against more powerful adversaries is however uncertain During times of war democratic societies suffer tension between norms of humane conduct and pressures to win at the lowest possible costs The painful lesson of *Targeting Civilians in War* is that when these two concerns clash the latter usually prevails
