Between Here and There Daniel Morales (History teacher), 2024 Between Here and There is the first history of the creation of modern US Mexico migration patterns narrated from multiple geographic and institutional sites This book analyzes the interplay between the US and Mexican governments civic organizations and

migrants on both sides of the border and offers a revisionist and comprehensive view of Mexican migration as it was established in the early twentieth century and reproduced throughout the century as a socioeconomic system that reached from Texas borderlands to western agricultural regions like California as well as to Midwestern farming and industrial areas. The book illustrates how large scale migration became entrenched in the socioeconomic fabric of the United States and Mexico. Mexican migration operates through an interconnected transnational migrant economy made up of self-reinforcing local economic logics, information diffusion, and locally based transnational social networks. From central Mexico, the book expands across the United States and back to Mexico to show how the migrant economy spread and reacted to the political and economic crisis in the 1930s. In the 1930s, migrants fought for recognition in both societies. Those who returned to Mexico used an expansive vision to lay claim to citizenship and land there. Those who stayed in the United States joined efforts to lay claim to better pay, working conditions, and rights from the New Deal state, creating a base for later organizing. These dynamics shaped the establishment of the Bracero Program that brought in more than four million workers and has continued to frame large scale Mexican migration until today.

Manual of Romance Languages in Africa Ursula Reutner, 2023-12-18. With more than two thousand languages spread over its territory, multilingualism is a common reality in Africa. The main official languages of most African countries are Indo-European. In many instances, Romance languages were primarily brought to Africa in the era of colonization. The areas discussed in this volume are thirty-five states that were once ruled by Belgium, France, Italy, Portugal, or Spain, and the African regions still belonging to three of them. Twenty-six states are presented in relation to French, four to Italian, six to Portuguese, and two to Spanish. They are considered in separate chapters according to their sociolinguistic situation, linguistic history, external language policy, linguistic characteristics, and internal language policy. The result is a comprehensive overview of the Romance languages in modern-day Africa. It follows a coherent structure, offers linguistic and sociolinguistic information, and illustrates language contact situations, power relations, as well as the cross-fertilization and mutual enrichment emerging from the interplay of languages and cultures in Africa.
