**The Caregiver's Toolbox** Carolyn P. Hartley, Peter Wong, 2015-08-03 Millions of Americans are or will be amateur caregivers for ill spouses, parents or friends. Caregivers today more than ever use technology to help manage schedules, medication routines, and pharmacy reminders, legal and financial affairs, as well as travel and expenses. Yet recent insurance options and health care's emerging digital world make for an overwhelming complex process. If you are one of the 64 million current caregivers, could you access your parents' critical documents in an emergency using their user IDs and passwords? Do you know how often your parents or parents-in-law are taking medications, how often your loved one goes to the doctor, and how to be involved in medical and life decisions? Statistics show 85 percent of caregivers are not trained in caregiving, so many people are likely winging it, picking up pieces of information here and advice there. The Caregiver's Toolbox is your guide to cool apps and online tools, insider tips on how to reduce your medical bills, your privacy rights as a caregiver, where to go for free and low-cost help, and much more. It clearly shows which tools will relieve your stress and those that may add stress. The authors dedicate much of their professional lives to helping people navigate the health care matrix. **Harnessing the Power of Technology to Improve Lives** P. Cudd, L. de Witte, 2017-09-05 The lives of people with disabilities are complex and various, and there are many situations where technology, particularly assistive technology, already makes a real difference. It is clear that smart phone and tablet computer-based solutions continue to enhance the independence of many users, but it is also important that more traditional assistive technologies and services are not forgotten or neglected. This book presents the proceedings of the 14th conference of the Association for the Advancement of Assistive Technology in Europe (AAATE) 2017, entitled "Harnessing the power of technology to improve lives," held in Sheffield, UK, in September 2017. This 4-day event about assistive technologies (AT) highlights the association's interest in innovating, not only technology but also services, and addresses the global challenge of meeting the needs of the increasing number of people who could benefit from assistive technology. The 200 papers in the book are grouped under 30 subject headings and include contributions on a wide range of topical subjects, including aging well, dementia care, robotics, eHealth, and apps innovations, universal design, sport, and disordered speech. The breadth of the AAATE conference reflects people's life needs, and so the book is sure to contain something of interest to all those whose work involves the design, development, and use of assistive technology, whatever the situation. The photo on the front cover illustrates the breadth of assistive technologies that can improve lives.
