Calarco,2023-04-27 Roadkill is a recurrent but often unthought feature of modern life Yet consideration of the broader significance of the myriad social ethical and political issues related to roadkill has largely gone missing from mainstream scholarship and activism This neglect persists even in fields such as mobility studies and animal studies that would otherwise seem to have a vested interest in the topic This book aims to bring roadkill to the foreground of current discussions among scholars and activists in these fields in order to demonstrate that roadkill is a uniquely important site from which to understand and contest the machinations of the dominant social order It argues that a careful examination of roadkill can help both to uncover the hidden violence of contemporary human centered systems of mobility and to develop alternative modes of mobility for a renewed social life in common with our more than human kin Straphanger Taras

Grescoe,2012-04-24 Taras Grescoe rides the rails all over the world and makes an elegant and impassioned case for the imminent end of car culture and the coming transportation revolution I am proud to call myself a straphanger writes Taras Grescoe The perception of public transportation in America is often unflattering a squalid last resort for those with one too many drunk driving charges too poor to afford insurance or too decrepit to get behind the wheel of a car Indeed a century of auto centric culture and city planning has left most of the country with public transportation that is underfunded ill maintained and ill conceived But as the demand for petroleum is fast outpacing the world s supply a revolution in transportation is under way Grescoe explores the ascendance of the straphangers the growing number of people who rely on public transportation to go about the business of their daily lives On a journey that takes him around the world from New York to Moscow Paris Copenhagen Tokyo Bogot Phoenix Portland Vancouver and Philadelphia Grescoe profiles public transportation here and abroad highlighting the people and ideas that may help undo the damage that car centric planning has done to our cities and create convenient affordable and sustainable urban transportation and better city living for all

Johnston,2020-03-26 This is the story of a seductive idea

Over the past century the potential of new technology to solve social dilemmas has captivated modern culture From apps that encourage physical activity to airport scanners meant to prevent terrorism the concept that clever innovation can improve society is irresistible but faith in such technological fixes is seldom questioned Where did this idea come from what makes it so appealing and how does it endanger our future Techno Fixers traces the source of modern confidence in technology to engineering hubris radical utopian movements science fiction fanzines policy makers soundbites corporate marketing and optimistic consumer culture from the turn of the twentieth century until today Sean Johnston demonstrates that through the promotion of prominent government scientists technocrats entrepreneurs and popular media modern invention became the favourite tool for addressing human problems and society s ills Nonetheless when it comes to assessing the success of cigarette filters as the solution to safe smoking or DDT as the answer for agricultural productivity the evidence is sobering Cautioning that the rhetoric of technological fixes seldom matches reality Johnston examines how employing innovation to bypass traditional methods can foster as many problems as it solves A critical examination of modern faith in technology Techno Fixers evaluates past mistakes present implications and future opportunities for innovating societies *Mobilities, Mobility Justice and Social Justice* Nancy Cook,David Butz,2018-10-03 This book offers a cutting edge overview of mobility
