CARSON
SIRENS

"The Ultimate Combination of Technology, Styling, and Control"

Introducing the *SC-409 COMMANDER*: the most technologically advanced and stylish console mount light control siren. The new *COMMANDER* incorporates superior functional versatility with face programmable and dip switch selectable options to control nearly every kind of lightbar, directional light, auxiliary light, and other auxiliary equipment including multiple gun locks and video camera systems.

The *SC-409 COMMANDER* represents the introduction of many new technological advancements including five new patent pending features:

- **Video Trigger:** A dedicated line to a video system that signals it to record when the lever switch or selected auxiliary switches are activated. This provides complete control to insure that the video system is prompted to record with activating a combination of any specified light output as well as any switch programmed as a gunlock timer.
- **Face Programmability:** Intuitively select each auxiliary switch's function by pushing the button to scroll through different control options. Programmable settings for each switch include the default on/off, Video Trigger activation with on/off, momentary, and 10 or 20 second timed momentary for use as a gunlock timer.
- **Lever Switch Programmability:** Select whether the lever switch activates the outputs progressively, independantly or non-progressive, or a combination of the two in a partially progressive fashion. In addition, the installer may program specific auxiliary switches to be activated and de-activated automatically when the lever switch is activated through the different positions.
- **Face Diagnostic Indicators:** Each light and siren output is individually protected with externally exposed fuses and have independent diagnostic sensors at the connectors that display the status of each output on the face of the unit. Audible and visual alerts are transmitted when the sensor detects an output that is not functioning properly.
- **Splash Resistant Rubberized Face:** The unit incorporates built in auxiliary and siren switches with embedded backlighting and flanges to seal around the lever switch actuators and volume control knob for improved protection for the internal circuitry from common accidental spills.

departments Every practicing manager may not want to read the whole book but I am willing to guarantee that every one will find at least one or more chapters that will be practically useful In this time of economic crisis the need for effective management practices is more acute than ever
