is intended than if new theories of construction as it ought to be according to many of those who presume to teach the skilled mechanic had been advocated It will no doubt have been observed by those who are interested in the subject that cabinet making as distinguished from joinery has received scant attention as with scarcely an exception the books professedly treating of the former only have included much that pertains to the latter Those who are practically acquainted with the manufacture of furniture will understand the reasons which however it is unnecessary to explain here About the Publisher Forgotten Books publishes hundreds of thousands of rare and classic books Find more at [www.forgottenbooks.com](http://www.forgottenbooks.com) This book is a reproduction of an important historical work Forgotten Books uses state of the art technology to digitally reconstruct the work preserving the original format whilst repairing imperfections present in the aged copy In rare cases an imperfection in the original such as a blemish or missing page may be replicated in our edition We do however repair the vast majority of imperfections successfully any imperfections that remain are intentionally left to preserve the state of such historical works
