

## SECTION 1 BEFORE DRIVING YOUR CADILLAC ELDORADO

Instructions and suggestions on proper operation and care are contained in this Owner's Manual. Please refer to it as frequently as needed to help maintain the performance of your Eldorado.

### FINAL DRIVE

While reading this manual, you will see many references to the "Final Drive." The Final Drive on your front-wheel-drive car takes the place of a differential (rear axle) used on rear-wheel-drive cars.

### DRIVER DAILY CHECKLIST

Be sure you know your car and its equipment and how to use it safely.

#### Before Entering the Car

1. See that windows, mirrors and lights are clean and unobstructed.
2. Check whether any tire is low or flat. (If any tire looks different from normal, check it with a tire pressure gauge.)
3. Look for fluid leaks.
4. Be sure everything is properly stored.
5. Check the area behind the car if you are about to back up.

#### Before Driving Off

1. Lock all doors.
2. Adjust the seat and movable head restraints.

3. Adjust inside and outside mirrors.
4. **DO NOT** allow anyone to ride where there is no seat belt, and **WAYS** properly fasten seat belts.
5. Check that all the necessary things work as the key is turned "Start."
6. Check all pages (including the last page).

See related topics in this manual; the Maintenance Schedule labels; problems are found.

### KEYS

Two different keys are provided for the locks on your car. The key code is stamped on the "knock-out" plug on each key head.

- Key with square head - for ignition lock only.
- Key with oval head - for all other locks.

Your Cadillac Dealer removed these plugs and placed them with the spare set of keys in the owners literature package that was given to you at time of delivery.

Fig. 1.1 Eldorado Keys

For car security:

- Record the key code numbers.
- Keep the key codes in a safe place (such as your wallet). **NOT IN THE CAR.**

Stamped on the key is a letter indicating the proper key blank needed if duplicates are required. If the original keys are lost, duplicates can be made using the key codes. Contact any GM dealer or a locksmith.

If you park in an attended lot, leave only your square-head ignition key. Lock your glove box and take the oval-head key with you. This will help prevent illegal entry into the glove box (if locked) and trunk compartment.

It's a good idea to consider carrying an extra key to the door in your wallet or purse, should you accidentally lock your regular keys in the vehicle.

To help protect your Eldorado and its contents against theft, General Motors has designed in anti-theft features which would also make it inconvenient and possibly expensive to enter the vehicle if you are locked out.

### DOOR LOCKS

To lock either car door, press the interior door lock button down and close the door. The outside door handle button does not need to be pressed in to lock the door.

The doors may be locked and unlocked with the oval head key. Lock the doors from inside by pressing the interior door lock button down. Unlock by raising the button.

When the door is locked, movement of the inside door handle does not unlock or open the door. The door must be unlocked before it may be opened. Avoid pushing on the door glass when opening or closing door.

**CAUTION:** To help lessen the chance and/or severity of personal injury in an accident, always lock the doors when driving. Along with using the seat belts properly, locking the doors helps prevent occupants from being thrown from the vehicle during accidents. It also helps prevent unintended opening of the doors and helps keep car intruders when the car is stopped.

Fig. 1.2 Door Lock, Window and Fuel Controls

### POWER DOOR LOCKS

A power door lock control is located on each door nearest switch panel. To lock or unlock all doors simultaneously, move the switch toward or away from the word "LOCK".

The power door lock switches on either front door armrest also use the optional Theft Deterrent System; for details, see "Theft Deterrent System" in this section.

### AUTOMATIC DOOR LOCK SYSTEM

On cars equipped with the Automatic Door Lock System, the doors will lock when the shift lever is moved into Drive, if the driver's seat is occupied, the doors are closed, and the ignition is turned on.

Unlocking the doors can be accomplished in the following ways. Moving the transmission shift lever to "P" (Park) will unlock all doors. The doors can be unlocked individually with their respective lock button on that door trim.
