Ca Culprit User Manual:

Earth: The Operators' Manual Richard B. Alley, 2011-04-18 The book companion to a PBS series that proves humans are causing global warming and offers a path to the future Since the discovery of fire humans have been energy users and always will be And this is a good thing our mastery of energy is what separates us from the rest of the animal kingdom and has allowed us to be the dominant species on the planet However this mastery comes with a price we are changing our environment in a profoundly negative way by heating it up Using one engaging story after another coupled with accessible scientific facts world authority Richard B Alley explores the fascinating history of energy use by humans over the centuries gives a doubt destroying proof that already high levels of carbon dioxide are causing damaging global warming and surveys the alternative energy options that are available to exploit right now These new energy sources might well be the engines for economic growth in the twenty first century
