

1. **Introduction**

The purpose of this study is to investigate the effects of a new educational program on student performance. The program was designed to improve critical thinking and problem-solving skills through a series of interactive exercises and projects. The study was conducted over a period of six months, involving a sample of 120 students from a large university. The data was collected through a combination of pre-test and post-test assessments, as well as student self-reports. The results of the study indicate that the program had a significant positive impact on student performance, particularly in the areas of critical thinking and problem-solving. The findings suggest that the program is a valuable tool for enhancing student learning and should be implemented more widely in higher education.
