Guillermo Auad, Marcel Babin, David A. Balton, Eddy C. Carmack, Robert W. Corell, Dorthe Dahl-Jensen, Andrey V. Dolgov, Edel O. Elvevoll, Elizaveta Ershova, Brian D. Fath, Andrea M. Fisher, Matthias Forwick, Sam Herreid, Alf Håkon Hoel, Grete K. Hovelsrud, Henry P. Huntington, Anne Husebekk, Brendan P. Kelly, Malinda Labriola, Rolf Mjelde, Lars-Otto Reiersen, Kenneth Ruud, Gunnar Sand, Asgeir J. Sørensen, Shirley Tagalik, Andrea Tilche, Frances Ulmer, Francis K. Wiese, Eduard Zdor, 2021-05-01 Climate change in the Arctic Ocean has stirred a remarkable surge of interest and concern Study after study has revealed the astonishing speed of physical chemical ecological and economic change throughout the expanse of the Arctic What are the consequences of

the changing Arctic are not restricted to the Arctic itself but affect everyone in the Northern Hemisphere ranging as they do from extreme weather to resource availability and food security with implications for politics economics and sociology The challenge is to comprehend the full extent and variety of these consequences and meeting this challenge will demand a multi and transdisciplinary understanding Only by this means can we hope to map out a knowledge based ecosystem and move toward knowledge based resource management the essential precondition for any sustainable future In this book leading international experts from many fields of science and across the entire pan Arctic region give their specific takes on where the Arctic Ocean is heading All have taken care in their writing not to exclude non experts in the conviction that multi and transdisciplinarity can only be achieved when communication and outreach are not tribal in nature The recurrent guiding theme throughout these pages is Whith er the Arctic Ocean Taken in concert the essays synthesize the current state of scientific knowledge to project how climate change may impact on the Arctic Ocean and the continents around it How can and how should we prepare for the imminent future that is already lapping at the threshold of the commons What readers will hopefully take from this multi and transdisciplinary endeavor is not the individual perspective of each contribution but the picture that emerges across the entire suite of essays As we move into a near future that will encompass both the probable and surprises this book attempts to conjure the multi dimensional space in which a sustainable future must be brought into being

Governing Complexity in the Arctic Region Mathieu Landriault,Andrew Chater,Elana Wilson Rowe,P. Whitney Lackenbauer,2019-10-28 This book examines emerging forms of governance in the Arctic region exploring how different types of state and non state actors promote and support rules and standards The authors argue that confining our understandings of Arctic governance to Arctic states and a focus on the Arctic Council as the primary site of circumpolar governance provides an incomplete picture Instead they embrace the complexity of governance in the Arctic by systematically analyzing and comparing the position interventions and influence of different actor groups seeking to shape Arctic political and economic outcomes in multiple sites of Arctic politics both formal and informal This book assesses the potential that sub national governments corporations civil society organizations Indigenous peoples and non Arctic states possess to develop norms and standards to ensure a stable rule based Arctic region It will be of interest to all scholars and students working in the fields of Arctic Sovereignty Security Studies Global Governance and International Political Economy

Baaij, 2018-02-01 How can the European Union create laws that are uniform in a multitude of languages Specifically how can it attain both legal integration and language diversity simultaneously without the latter compromising the former C J W Baaij argues that the answer lies in the domain of translation A uniform interpretation and application of EU law begins with the ways in which translators and jurist linguists of the EU legislative bodies translate the original legislative draft texts into the various language versions In the European Union law and language are inherently connected The EU pursues legal integration i.e the incremental

harmonization and unification of its Member States laws for the purpose of reducing national regulatory differences between Member States However in its commitment to the diversity of European languages its legislative institutions enact legislative instruments in 24 languages Language Diversity and Legal Integration assesses these seemingly incompatible policy objectives and contemporary translation practices in the EU legislative procedure and proposes an alternative source oriented approach that better serves EU policy objectives Contrary to the orthodox view in academic literature and to the current policies of the EU this book suggests that the English language version should serve as the original and only authentic legislative text Translation into the other language versions should furthermore avoid prioritizing clarity and fluency over syntactic correspondence and employ neologisms for distinctly EU legal concepts Ultimately Baaij provides practical solutions to the conflict between the equality of all language versions and the need for uniform interpretation and application of EU law
