 contains a series of articles which take a critical look at various religious and paranormal phenomena *Comics Beyond
 Text and Image* Benjamin Fraser, 2025-08-08 Comics Beyond Text and Image conceptualizes comics as bodies exploring the

substance and the many movements and expressions of comics first and foremost in terms of corporeality The book centers on the metaphor of the comics body as a way of opening up our understandings of what comics do It begins from the position that narrative in comics is corporeal expressed in and through the visual bodies into which the page can be divided analytically and from the interaction of the human body with the comics body Drawing on the philosophy of Baruch Spinoza the author argues for the primary role of visual narration over textual narration develops a theory of the comics text as a cohesive and variegated cartography and shows how thought is expressed in the extensive space of the comics page This theory is then applied in snapshots of individual comics works that each in their own way continue the philosophical discussions of embodiment This book moves beyond traditional modes of narration or narrative and will appeal to students and scholars of comics studies as well as to those thinking about visual narrative more broadly and to scholars of Spinoza and Deleuze

The Researcher's Journey Klaus Solberg Söilen, 2025-07-01 Navigating the academic ecosystem involves a variety of challenges that extend beyond the application of research methods These challenges include understanding the university structure academic conferences publication strategy securing research funding and how modern technologies like artificial intelligence have changed the very purpose of researchers Written in an engaging and accessible tone this book guides advanced and early career researchers through the real world challenges that face academics in the social sciences The book is divided into three parts The first gives a brief history of the scientific method and social science research processes the second critically addresses the current state of research methods in the social sciences and the third discusses implications for ethics in light of scientific and technological advances *Paperbacks in Print* ,1980 **Paperback Trade News** ,1962

Chinese Philosophy Ronnie L. Littlejohn, 2015-11-18 The philosophical traditions of China have arguably influenced more human beings than any other China has been the home not only of its indigenous philosophical traditions of Confucianism and Daoism but also of uniquely modified forms of Buddhism As Ronnie L Littlejohn shows these traditions have for thousands of years formed the bedrock of the longest continuing civilization on the planet and Chinese philosophy has profoundly shaped the institutions social practices and psychological character of East and Southeast Asia The author here surveys the key texts and philosophical systems of Chinese thinkers in a completely original and illuminating way Ranging from the Han dynasty to the present he discusses the six classical schools of Chinese philosophy Yin Yang Ru Mo Ming Fa and Dao De the arrival of Buddhism in China and its distinctive development the central figures and movements from the end of the Tang dynasty to the introduction into China of Western thought and the impact of Chinese philosophers ranging from Confucius and Laozi to Tu Weiming on their equivalents in the West *After Poststructuralism* Colin Davis, 2004-03-01 In the last decades of the twentieth century French poststructuralist theory transformed the humanities it also met with resistance and today we frequently hear that theory is dead In this brilliantly argued volume Colin Davis reconsiders key arguments for and against theory identifying significant misreadings reassesses the contribution of

poststructuralist thought to the critical issues of knowledge ethics hope and identity sheds new light on the work of Jean Fran ois Lyotard Emmanuel Levinas Louis Althusser and Julia Kristeva in a stunning series of readings offers a fresh perspective on recent debates around the death of theory In closing he argues that theory may change but it will not go away After poststructuralism then comes the afterlife of poststructuralism Wonderfully accessible this is an account of the past and present fortunes of theory suitable for anyone researching teaching or studying in the field And yet it is much more than this Colin Davis provides a way forward for the humanities a way forward in which theory will play a crucial part **Benevolent Living** Richard Hazelett, Dean Turner, 1990 **The Paradox of Da Free John** , Four Views on Christian Metaphysics Timothy M. Mosteller, 2022-03-10 Four Views on Christian Metaphysics presents four prominent views held among Christians today on the major questions in philosophical metaphysics What is the nature of existence itself What is it for something to exist What are universals What is the soul How do these things relate to God in light of special and general revelation The four Christian perspectives presented in this book are Platonism Aristotelianism idealism and postmodernism The purpose of this book is to help Christians think deeply and carefully about a Christian view of the ultimate nature of reality and our place in it From Christianity to Judaism Yosef Kaplan, 1989-01-01 Isaac Orobio de Castro a crypto Jew from Portugal was one of the most prominent intellectual figures of the Sephardi Diaspora in the seventeenth century After studying medicine and theology in Spain and having pursued a distinguished medical career he was arrested by the Spanish Inquisition for practising Judaism tortured tired and imprisoned He subsequently emigrated to France and became a professor of medicine at the University of Toulouse before openly professing his Judaism and going to Amsterdam where he joined the thriving Portuguese Jewish community Amsterdam was then a city of great cultural creativity and religious pluralism where Orobio found open to him the world of religious thinkers and learned scholars In this atmosphere he flourished and became an outstanding spokesman and apologist for the Jewish community He engaged in controversy with Juan de Prado and Baruch Spinoza who were both excommunicated by the Portuguese Jewish community as well as with Christian theologians of various sects and denominations including Philip van Limborch This fascinating biography of Orobio sheds light on the complex life of a unique Jewish community of former Christians who had openly returned to Judaism It focuses on the particular dilemmas of the converts their attempts to establish boundaries between their Christian past and their new identity their internal conflicts and their ability to create new forms of Jewish life and expression *A History of Arabic Astronomy* George Saliba, 1995-07-01 A History of Arabic Astronomy is a comprehensive survey of Arabic planetary theories from the eleventh century to the fifteenth century based on recent manuscript discoveries George Saliba argues that the medieval period often called a period of decline in Islamic intellectual history was scientifically speaking a very productive period in which astronomical theories of the highest order were produced Based on the most recent manuscript discoveries this book broadly surveys developments in Arabic planetary theories from the eleventh century to the fifteenth Taken

together the primary texts and essays assembled in this book reverse traditional beliefs about the rise and fall of Arabic science demonstrating how the traditional age of decline in Arabic science was indeed a Golden Age as far as astronomy was concerned Some of the techniques and mathematical theorems developed during this period were identical to those which were employed by Copernicus in developing his own non Ptolemaic astronomy Significantly this volume will shed much needed light on the conditions under which such theories were developed in medieval Islam It clearly demonstrates the distinction that was drawn between astronomical activities and astrological ones and reveals contrary to common perceptions about medieval Islam the accommodation that was obviously reached between religion and astronomy and the degree to which astronomical planetary theories were supported and at times even financed by the religious community itself This in stark contrast to the systematic attacks leveled by the same religious community against astrology To students of European intellectual history the book reveals the technical relationship between the astronomy of the Arabs and that of Copernicus Saliba s definitive work will be of particular interest to historians of Arabic science as well as to historians of medieval and Renaissance European science
