Consciousness and the Source of Reality Robert G. Jahn, Brenda J. Dunne, 2011 When Robert G Jahn and Brenda J Dunne first embarked on their exotic scholarly journey more than three decades ago their aspirations were little higher than to attempt replication of some previously asserted anomalous results that might conceivably impact future engineering practice either negatively or positively and to pursue those ramifications to some appropriate extent But as they followed that tortuous research path deeper into its metaphysical forest it became clear that far more fundamental epistemological issues were at stake and far stranger phenomenological creatures were on the prowl than they had originally envisaged and that a substantially broader range of intellectual and cultural perspectives would be required to pursue that trek productively This text is their attempt to record some of the tactics developed experiences encountered and understanding acquired on this mist shrouded exploration in the hope that their preservation in this format will encourage and enable deeper future scholarly penetrations into the ultimate Source of Reality
