Foundations Of Economics A Christian View:

Foundations of Economics Shawn Ritenour, 2010-01-01 Foundations of Economics A Christian View is an introduction to economics from an explicitly Christian perspective. It maintains that there is no conflict between Christian doctrine and economic science properly understood. Therefore Foundations of Economics has three goals: to demonstrate that the foundations of economic laws are derived from a Christian understanding of nature and humanity to explain basic economic principles of the market economy and apply them to various economic problems such as poverty and economic development; and to show the relationship between Christian ethics and economic policy. Foundations of Economics A Christian View accomplishes these goals by rooting the fundamental principles of human action in the Christian doctrines of creation and humanity and integrating them with the Christian ethic of private property. This volume explains the relevance of economics for fulfilling the cultural mandate set forth in the first two chapters of Genesis by demonstrating how economics can help us in our task to be fruitful and multiply and have dominion over the earth without spoiling creation, starving to death or descending into a barbaric struggle for survival.

Foundations of Economic Method Lawrence A. Boland, 2003-04-17 Many consider Foundations of Economic Method to be Lawrence Boland's best work. This updated edition is radically changed from the original and will be much appreciated by thinkers within economics. The book positions methodology vis-à-vis the current practice of economists and is all the better for it. Yet another book that not only deserves to be read.

Christian ethics and political economy Morten Bøsterud, Jan C.M. Venter, 2020-12-31 The value-free and relativistic human and scientific discourses have led to an era of ideology. From fascism at the dawn of the century through liberalism and the associated phenomenon of unfettered statism to the current disillusionment of postmodernism and relativism with endeavours towards new mercantilism. All have maintained poverty, inequality and created scepticism amongst both lay persons and academics. Above all else a renewed yearning for moral and ethical direction in political and

economic conduct has been created This book provides a Christian ethical reflection on political economic conduct in South Africa as an alternative to current modernistic ideas This book aims to produce new Christian ethical insight into the value of new liberal perspectives on the enhancement of the South African political economy New Christian ethical insight will be gained through new perspectives on the South African political economy **The Evolutionary Foundations of Economics**

Kurt Dopfer,2005-05-23 It is widely recognised that mainstream economics has failed to translate micro consistently into macro economics and to provide endogenous explanations for the continual changes in the economic system Since the early 1980s a growing number of economists have been trying to provide answers to these two key questions by applying an evolutionary approach This new departure has yielded a rich literature with enormous variety but the unifying principles connecting the various ideas and views presented are as yet not apparent This 2005 volume brings together fifteen original articles from scholars each of whom has made a significant contribution to the field in their common effort to reconstruct economics as an evolutionary science Using meso economics as an analytical entity to bridge micro and macro economics as well as static and dynamic realms a unified economic theory emerges *The Economics of Prosperity* Shawn

Render Unto God Ryan C. McIlhenny, 2015-09-18 The Great Recession like most economic depressions has compelled many to reconsider not only the consequences but also the very nature of contemporary global capitalism Sadly very little critical reflection on the fundamental nature of the world s hegemonic economic system has come from its most devout disciples evangelicals Throughout the pages of the Old and New Testament God reprimands those driven by a love for gain By way of the cultural mandate God has given humanity the responsibility to care not only for their fellow human beings but also for the earth itself True and undefiled religion includes taking care of those forgotten marginalized and made invisible by all consuming and all mighty capital As such those who accumulate wealth by destroying creation dishonor their Creator Has the Christian community gone far enough in meeting the needs of the poor in seeking the end of poverty or in curbing the rapacious appetites of the greedy few in order to preserve that which is good true and beautiful within God s creation Render Unto God calls Christians to reconsider their ideological commitment to unrestrained capitalism to rethink not only the profit motive an essential element of capitalism if not its central telos the meaning of private property and the dominion of the global power elite but also to understand how market fundamentalism fractures families creates systems of inequality and destroys the environment Have we forgotten our commitment to God neighbor and creation Have we forgotten our primary purpose the reason for our existence namely to glorify God and enjoy him forever

Religion and Economics: Normative Social Theory J.M. Dean,A. M. C. Waterman,2012-12-06 Normative Social Theory James M Dean and A M C Waterman University of Manitoba 1 Economics and Religion Once Again This book is a sequel to Economics and Religion Are They Distinct Brennan and Waterman 1994 That volume was motivated by a frustration born of many disappointing encounters between economists and theologians in the 1980s Can bishops synods and other voices of organized religion bring any interesting and disinterested contribution to the public policy debate If so what is the relation of their contribution to that of the purely secular knowledge economists believe they can supply Can economists bring any interesting and disinterested contribution to the public policy debate If so what is the relation of their contribution to the fundamental values that inform social ethics and that are still guarded to a large extent by religious tradition All too often the two sides talked at cross purposes Well intentioned economists coexisted for a few hours or days with well intentioned theologians whose manner of conceiving social reality was radically incompatible with their own There seemed to be no common ground The first requisite of any genuine conversation is an agreed conceptual framework that is able to accommodate the peculiar social vision both of the economist and of theologian and to display the logical relation between the two
