Foundations Of The Everyday Shock Deferral Repetition Philosophical Projections:

Foundations of the Everyday Eran Dorfman, 2014 A highly original and interdisciplinary study of the philosophy of the everyday *Foundations of the Everyday* Eran Dorfman, 2014-06-04 We are used to seeing the everyday as an ordinary aspect of life something that we need to overcome whereas it actually plays a crucial role in any event of our lives This highly original book engages with a range of thinkers and texts from across the fields of phenomenology psychoanalysis and critical theory including Husserl Heidegger Merleau Ponty Freud and Benjamin together with innovative analysis of French literature and the visual arts to demonstrate that the role of repetition and deferral in modernity has changed dramatically Rather than allowing the everyday gradually to integrate singular events into its repetitive texture events are experienced now as self enclosed entities allegedly disconnected from the everyday leading to its impoverishment The book thus offers a novel understanding of being body trauma and shock but within the framework of the everyday as a concept that deserves a theory of its very own *Nancy, Blanchot* Leslie Hill, 2018-09-30 The concept of community is one of the most frequently used and abused of recent philosophical or socio political concepts In the 1980s faced with the imminent collapse of communism and the unchecked supremacy of free market capitalism the philosopher Jean Luc Nancy in *The Inoperative Community* and the writer Maurice Blanchot in *The Unavowable Community* both thought it essential to rethink the fundamental basis of community as such More recently Nancy has renewed the debate by unexpectedly attacking Blanchot's account of community claiming that it embodies a dangerously nostalgic desire for mythic and religious communion This book examines the history and implications of this controversy It analyses in forensic detail Nancy's and Blanchot's contrasting interpretations of German Romanticism and the work of Heidegger Bataille and Marguerite Duras and examines closely their divergent approaches to the contradictory legacy of Christianity At a time when politics are increasingly inseparable from a deep seated sense of crisis it provides an incisive account of what in the concept of community is thought yet crucially still remains unthought **Entropic Philosophy** Shannon M. Mussett, 2022-01-31 Now is a time of tremendous anxiety about the present and future state of the world As the second law of thermodynamics states entropy never decreases time marches relentlessly forward and closed systems inevitably break down Entropy serves as a powerful metaphor capturing expressions of growing malaise and decline *Entropic Philosophy* Chaos Breakdown and Creation builds on the meaning of entropy from the Greek entropia signifying a turning toward or transformation Developing a philosophy of entropy this book draws variously from anthropology psychoanalysis literature art and the history of philosophy This approach opens pathways for reverence and care that are crucial in preventing fear existential inertia and despair *The Work of Forgetting* Stephane Symons, 2018-12-14 For over fifty years the concept of memory has played a crucial role in a large number of academic and societal debates *The Work of Forgetting Or How Can We Make the Future Possible* draws attention to the limits of the academic field of memory studies It argues that the faculty of memory offers an inadequate

response to the challenges of the present The book sets up a dialogue between the philosophies of forgetting that underlie the writings of Friedrich Nietzsche Walter Benjamin and Gilles Deleuze and the philosophies of memory that inform the work of Sigmund Freud Martin Heidegger and Hannah Arendt It builds on the idea that history is inseparable from a type of transience that cannot be counter acted by the preserving work of memory and develops a new understanding of the phenomenon of forgetting in which the passage of time is asserted in thought and thus made productive

Remains of a Self Cathrine Bjørnholt Michaelsen, 2021-06-29 From the twentieth century in the twenty first psychoanalysis and deconstruction have challenged and continue to challenge our conceptions of subjectivity and selfhood Psychoanalysis revealed that even in our innermost households we are never quite alone rather instances of otherness incessantly interfere in our most intimate relation to ourselves forcing us to adapt continuously Deconstruction inheriting both this psychoanalytic disclosure and Heidegger's destruction of the history of metaphysics went to the foundations of the Western constructions of the subject and the self only to find how a destabilizing otherness was always already haunting them What if anything remains of the self in the aftermath Early on in the wake of deconstruction a certain misconceived and simplified notion of the death of the subject was proclaimed and in recent years more or less successful attempts have been made at reviving the notions of the subject the self and agency In contrast to these attempts at revival this book offers a two pronged approach On the one hand it argues that neither psychoanalysis nor deconstruction propounds a simple annihilation of the subject or liquidation of the self on the other hand however neither do they pave the way for a return to the subject or resurrection of the self that would allow us once again to become confident about our presence to ourselves Instead this book suggests that if we set ourselves the task of taking up the heritage from psychoanalysis and deconstruction in a serious manner we are obliged to retrace the subject and the self as undergoing perpetual auto deconstruction

The Thought of Matter Richard A. Lee Jr., 2015-12-18 Discussions of materialism have exploded in recent years From the speculative realism materialism of Quentin Meillassoux to the New Materialism of many modern Marxisms the interest in a return to or rehabilitation of materialism is on the rise What is not analyzed in many of these discussions however is a trenchant methodological and metaphysical problem lying at the basis of any philosophical materialism if matter is simply that which is other than thought then how can it be thought without drawing it away from its materiality On the other hand if one assumes a direct access to matter to this other what are the conditions of that access Are they material conditions or cognitive thought conditions Does what would present itself immediately present at the same time the conditions that allow it to be presented If not then we are closer to a theology of matter and further from a philosophical materialism The Thought of Matter investigates this metaphysical and methodological problem through Aristotle Marx Adorno Althusser Duns Scotus Hobbes and Benjamin in order to show that a philosophical materialism necessarily requires the concepts and tools of thought in order to allow the otherness of matter to emerge in its own materiality

Political Loneliness Jennifer Gaffney, 2020-07-07 Political

Loneliness Modern Liberal Subjects in Hiding examines the loneliness that remains at work in modern life even as we find ourselves increasingly interconnected While much has been said about this experience in the main currents of continental philosophy this book opens new paths within this discourse by developing the problem of loneliness in a political register The central claim of this book is that neoliberal subjectivity has rendered us lonely Drawing especially on the work of Hannah Arendt the author suggests that the political structures we have inherited from the liberal tradition such as the anonymity of the vote and the right to pursue one's private self interest as far as possible have left us hidden from one another unable to appear as members of a common world The author further argues that it is precisely this experience of political loneliness that renders citizens in liberal and allegedly open societies desperate to belonging and willing in turn to surrender to delusional fellowships like totalitarianism By developing the problem of loneliness in a political register this book offers a framework for interpreting the rise of totalitarianism at the beginning of the twentieth century no less than the recent ascendance of right wing populism in Western liberal democracies today It thus makes an important contribution to debates in current continental philosophy liberal political theory and critical theory regarding issues of alienation political life and community in the present age

On the Brink Werner Hamacher, 2020-08-27 This collection of essays by one of the foremost figures in contemporary theory takes as its theme the edge or limit between language time history and politics These are essays that are all on the brink the very extreme at which one can no longer define where one is located neither on the cliff say nor over the edge To be on the brink is to take up that extreme limit the point of contamination or indetermination where language time history and politics all converge upon one another On the Brink begins with a consideration of Kant's treatment of time as representation and of Hegel's treatment of the writing of history and the end of art all while taking up other key figures in the history of philosophy The book then moves to an exploration of language in a variety of manifestations from translation to complaint and greeting It concludes by analyzing political and social questions that continue to haunt us today the conception of work not least in National Socialism and our relationship to democracy Taken together Werner Hamacher's essays offer trenchant historical political and rhetorical interventions into the history of philosophy literature and our contemporary political situation

Fraught Decisions in Plato and Shakespeare Dianne Rothleder, 2020-11-17 In the reincarnation myth in Book X of Plato's Republic the unnamed first soul who has lived a good life and has been rewarded in the afterlife chooses a new life and fate and chooses catastrophically badly He finds himself fated to eat his own children Despite being warned to blame only himself he wails and blames anything and everything else in his conviction that his fate is undeserved Though he should not be shocked because he has made this choice himself he is incredulous because he has completely misunderstood the nature of his choice Starting with Plato's myth this book looks at the errors this soul has made and considers these errors through both the Republic and a series of paired Shakespeare plays Reading the Republic along with Othello and The Comedy of Errors the first section focuses on the misreading of comedy and

tragedy in the life of the individual returning to the Republic and using *The Merchant of Venice* and *Pericles Part II* focuses on the broadened context of the misuse of political and economic forces returning again to the Republic and reading *Timon of Athens* and *Measure for Measure* Part III focuses on the broadest context the misunderstanding of the inseparability of birth and infinite debt The hope of the text and the hope of human life is to help us avoid choosing lives that devour what we most love

Refugees Nathan Bell, 2021-03-18 There have never been more refugees across the world from Myanmar to Syria than at this moment Many more millions of refugees are likely to be displaced by the effects of climate change Why has politics failed to produce adequate responses to these challenges and not heeded the lessons of refugee crises of the past Are human rights and international law or more radically the case for open borders sufficient to address them Nathan Bell argues for nothing less than a new concept of the political that societies liberal or not in the mode of the sovereign state or some other form embrace an ethos of responsibility for others where the right to seek asylum becomes foundational for politics itself Such a proposal is at the antipodes of Schmitt's friend enemy distinction such that hospitality and not hostility forms the basis of political decision making This book comprises two halves the first establishes the theoretical basis of the ethos of responsibility with particular reference to the writings of Hannah Arendt Emmanuel Levinas and Jacques Derrida while the second half examines these theorists in the context of historical and contemporary case studies Finally the book calls for a politics of hauntology in memory of the missing those who might have been rescued and those yet to come who are already among the disappeared In this urgent work Bell demonstrates that a radical reconfiguration of the understanding of politics is required in order to safeguard the future and human dignity of stateless persons
