Decentralized Capacity Building

Development Academy of the Philippines, 2005-01-01 A new definition of capacity building is evolving one that is veering away from conventional ideas of organizational engineering As it encompasses the broad environment or system in which social changes occur capacitybuilding has become more complex yet also more rewarding Today some of the buzzwords are empowerment social capital enabling environment Moreover culture

values and power relations that influence and motivate organizations and individuals are gaining more attention There is respect and even appreciation now for informal patterns of personal and culture bound organizational behavior the unwritten rules of the game so to speak As well there is the urge to complement not replace indigenous habits and practices All of these are progressively coalescing into a body of concepts called capacity development *National Science Foundation Authorization Act of 1973* United States. distinct relationships with northern foundations These state responses illuminate the interrelationships among institutions with varying capacities to set agendas or to effect or resist change
