Four Arguments For The Elimination Of Television:

Four Arguments for the Elimination of Television Jerry Mander,2013-08-13 Persuasive interesting and unusual Kirkus Reviews A total departure from previous writing about television this book is the first ever to advocate that the medium is not reformable Its problems are inherent in the technology itself and are so dangerous to personal health and sanity to the environment and to democratic processes that TV ought to be eliminated forever Weaving personal experiences with meticulous research the author ranges widely over aspects of television that have rarely been examined and never before joined together allowing an entirely new frightening image to emerge The idea that all technologies are neutral benign instruments that can be used well or badly is thrown open to profound doubt Speaking of TV reform is in the words of the author as absurd as speaking of the reform of a technology such as guns Praise for the work of Jerry Mander Lively provocative Publishers Weekly A skilled writer Kirkus Reviews starred review

Oblivion: The Great Deceit and Why We Need to Reclaim Our Spiritual Evolution Aleksandar Ostojic,2019-08-08 End of Oblivion The Great Deceit and Why We Need to Reclaim Our Spiritual Evolution is an informal overview of the current state of humanity and the world and delves into how our perceptions of reality have been drastically distorted to the point where the majority of the population cannot perceive distortion any longer Deceit is present in every area of our lives but beneath these secular manifestations deeper metaphysical undercurrents are interlacing with our spiritual evolutionary direction Armed with a wealth of factual evidence as well as personal observations the author puts forth a compelling explanation as to who is really behind this great deceit and offers choices on how to break free for those curious enough to ponder It is time to remove our blindfolds to consciously choose our path and to reclaim the true purpose of our being our spiritual evolution The book reflects on the Law of One material

Get Out of My Room! Jason Reid,2017-01-19
Everybody has a teen bedroom story The teen bedroom has universally been regarded as a safe haven for adolescents from all classes and backgrounds and a near sacred space that's basically off limits to everyone but its teenage occupants and their invited guests But it's a relatively recent Western phenomenon that assumed a prominent role in socializing teens and shaping their identities during the years following World War II As part of the identity shaping process the teen bedroom became a safe space for teens to express their growing consumer power parallel to the emergence of youth subcultures after the War Reid tracks the history of bedrooms for children back to the Civil War period though the bulk of his research stretches from the late 1950s through the beginning of the 21st century The rock posters stuffed animals and record players that found their way into teen bedroom during this period represent ways in which tends became major contributors to the postwar consumer economy Reid by no means neglects popular culture in the meantime detailing the ways in which the teen bedroom appeared in song film television and literature It was often portrayed as a space of personal development and self

expression but also as a site profound loneliness and romantic longing To quote the Beach Boys 1963 hit song In My Room the postwar teen bedroom featured just as much sighing and crying as it did scheming and dreaming [Meta Television](#)
Erin Giannini,2024-03-18 The idea of metatextuality is frequently framed as a recent television development and often paired with the idea that it represents genre exhaustion US television however with its early live performances and set bound sitcoms always suggested an element of self awareness that easily shaded into metatextuality even in its earliest days Meta Television thus traces the general history of US television s metatextuality throughout television s history arguing that TV s self awareness is nothing new and certainly not evidence of a period of aesthetic exhaustion but instead is woven into both its past and present practice elucidated through case studies featuring series from the 1970s to the present day many of which have not been critically analyzed before and the various ways they deploy metatext to both construct and deconstruct their narratives Further Meta Television asserts that this re and de construction of narrative and production isn t just a reward to the savvy and or knowledgeable viewer or consumer but seeks to make broader points about the media we consume and how we consume it This book explores the ways in which the current metatextual turn in both the usual genres in which it appears horror and sci fi fantasy and its movement into drama and sitcom represents the next turn in television s inherent self awareness It traces this element throughout television s history growing from the more modest reflexivity of programs awareness of themselves as created objects in a particular medium to the more significant breaking of the fictive illusion and therefore the perceived distance between the audience and the series Erin Giannini shows how the increased currency of metatextual television in the contemporary era can be tied to a viewership well versed in its stories and production as well as able and willing to talk back via social media If television reflects culture to a certain extent this increased reflexivity mirrors that responsive audience as a consequence of the lack of distance that metafiction embraces As Robert Stam traced the use and implications of reflexivity in film and literature this book does the same for television further problematizing John Ellis s glance theory in terms of both production and spectatorship [Television at the Movies](#) Jon Nelson Wagner,Tracy Biga MacLean,2008-05-19 The co authors have a unique approach to the study of television viewing its history and reception not only through important articles about the medium but also through analyzing how Hollywood auteur cinema has commented on television over the decades in films such as Tootsie Network The Last Picture Show A Face in the Crowd Rollerball The King of Comedy and others Television at the Movies argues that the study of television is a crucial aspect of understanding our recent and contemporary culture and it provides an illuminating point of entry for students and researchers in the field

Keith Potter,Kyle Gann,2016-03-23 In recent years the music of minimalist composers such as La Monte Young Terry Riley Steve Reich and Philip Glass has increasingly become the subject of important musicological reflection research and debate

Scholars have also been turning their attention to the work of lesser known contemporaries such as Phill Niblock and Eliane Radigue or to second and third generation minimalists such as John Adams Louis Andriessen Michael Nyman and William Duckworth whose range of styles may undermine any sense of shared aesthetic approach but whose output is still to a large extent informed by the innovative work of their minimalist predecessors Attempts have also been made by a number of academics to contextualise the work of composers who have moved in parallel with these developments while remaining resolutely outside its immediate environment including such diverse figures as Karel Goeyvaerts Robert Ashley Arvo P rt and Brian Eno Theory has reflected practice in many respects with the multimedia works of Reich and Glass encouraging interdisciplinary approaches associations and interconnections Minimalism s role in culture and society has also become the subject of recent interest and debate complementing existing scholarship which addressed the subject from the perspective of historiography analysis aesthetics and philosophy The Ashgate Research Companion to Minimalist and Postminimalist Music provides an authoritative overview of established research in this area while also offering new and innovative approaches to the subject
