

Campus Wired LAN Designs Cisco Validated Designs

- The Need to Scale the Network
- All enterprise networks must: support critical applications, support converged network traffic, support diverse business needs, and provide centralized administrative control.
- Campus network designs include small networks that use a single LAN switch, up to very large networks with thousands of connections.
- A hierarchical LAN design includes
- the access, distribution, and core layers:
- The access layer provides endpoints and users direct access to the network.
- The distribution layer aggregates access layers and provides connectivity to services.
- The core layer provides connectivity between distribution layers for large LAN environments.
