**The Games People Play** Albert Wang, [The Hockey Stick Principles](#) Bobby Martin, 2016-05-24 In *The Hockey Stick Principles* author Bobby Martin shifts his focus away from all the hype about rapid growth and the pursuit of funding and instead takes a look at the real process behind getting a good idea off the ground. Many business books fuel unrealistic notions about what a good idea looks like: how fast a founder should attract investment and how quickly growth will take off. The problem with this mythology is that it can sometimes end with entrepreneurs abandoning their dreams too soon if they don't see immediate results. Using a hockey stick as a metaphor and highlighting four key phases, Martin shows the healthy way a business should grow and uses entertaining stories and interviews with successful entrepreneurs like the founders of LendingTree, Under Armour, and iContact woven throughout the book to not only share a wealth of advice but to chronicle the ins and outs of these different phases: The Tinkering Period, The tip of the stick, or the time when you first develop and hone your idea; The Blade Years, The formative years when growth can be flat and navigating the unpredictable process of creating a company can be rocky; The Inflection Point, The crucial point in time right before your business takes off when it's important for entrepreneurs to prepare and make decisions to properly manage rapid growth; Surging Growth. Once your company proves that they have potential, you need to optimize that growth and scale up in a sensible way. Innovation almost always involves a number of challenges, misdirections, and uncertainty and can take several years of struggle. But *The Hockey Stick Principles* gives aspiring entrepreneurs and those in the midst of the messy process a realistic, human, and inspiring understanding of what starting an innovative business is like while teaching you what to look out for along the way as you shepherd your business through to success.

[The Ten Toe Express: A Daily Journal of a 5,000 Mile Hike](#) Matt Gregory, 2021-07-19 This is the daily journal of Matt Gregory's 5,000 mile hike from Bellingham, Washington to Key West, Florida. He left Bellingham on September 1st, 2006. Author's Note: This book is the unedited journal I kept on the hike. Sometimes I went days without seeing a computer and wrote them in a notebook. Once I finally saw a computer, it was usually a mad dash to update each journal entry in a fixed amount of time at libraries, internet cafes, and people's houses. I made one pass fixing a few spelling errors but decided to keep everything else as is. To me, it keeps the essence of the journal alive. Most journal entries were written in a hurry while I was tired and pressed for time. Thank you for taking the time out to give this a read. I will finish the memoir soon.

**Pandemics and Resilience: Lessons we should have learned from Zika** David M. Berube, 2023-05-05 The aim of the book was to produce the most comprehensive examination of a pandemic that has ever been attempted By cataloging the full extent of the Zika pandemic this book will be the most complete history and epistemic contextualization ever attempted to date The work should function as the primary source for students researchers and scholars who need information about the Zika pandemic This book examines the technical literature digital and popular literature and online materials to fully contextualize this event and provide a bona fide record of this event and its implications for the future It is somewhat serendipitous that while this work was underway we are going through another pandemic One of the primary lessons we did not learn by Zika was pandemic events will return repeatedly and we need to learn from each one of them to prepare the planet for the next one Just because Zika seemed to have died out does not make it less important We were lucky that the virus evolved into what seemed to be a less virulent version of itself and the vector mosquitoes were concentrated elsewhere Finally this book represents a tour de force in scholarship involving nearly 4 000 sources of information and does not shy from a detailed examination of the controversies conspiracies and long term consequences when we avoid learning from outbreaks such as Zika
