Mastering Perl brian d foy, 2007-07-16 This is the third in O'Reilly's series of landmark Perl tutorials which started with *Learning Perl* the bestselling introduction that taught you the basics of Perl syntax and *Intermediate Perl* which taught you how to create reusable Perl software. *Mastering Perl* pulls everything together to show you how to bend Perl to your will. It conveys Perl's special models and programming idioms. This book isn't a collection of clever tricks but a way of thinking about Perl programming so you can integrate the real life problems of debugging, maintenance, configuration and other tasks you encounter as a working programmer. The book explains how to use advanced regular expressions including global matches, lookarounds, readable regexes and regex debugging. Avoid common programming problems with secure programming techniques. Profile and benchmark Perl to find out where to focus your improvements. Wrangle Perl code to make it more presentable and readable. See how Perl keeps track of package variables and how you can use that for some powerful tricks. Define subroutines on the fly and turn the tables on normal procedural programming. Modify and jury-rig modules to fix code without editing the original source. Let your users configure your programs without touching the code. Learn how you can detect errors Perl doesn't report and how to tell users about them. Let your Perl program talk back to you by using `Log4perl`. Store data for later use in another program, a later run of the same program or to send them over a network. Write programs as modules to get the benefit of Perl's distribution and testing tools. Appendices include Brian's Guide to Solving Any Perl Problem to improve your troubleshooting skills as well as suggested reading to continue your Perl education. *Mastering Perl* starts you on your path to becoming the person with the answers and failing that, the person who knows how to find the answers or discover the problem.

Sites of International Memory Glenda Sluga, Kate Darian-Smith, Madeleine Herren, 2023-08-08 Whether we think of statues, plaques, street names, practices, material or intangible forms of remembrance, the language of collective memory is everywhere installed in the name of not only nations or even empires but also an international past. The essays in *Sites of International Memory* address the notion of a shared past and how this idea is promulgated through sites and commemorative gestures that create or promote cultural memory of such global issues as wars, genocide and movements of cross-national trade and commerce as well as resistance and revolution. In doing so, this edited collection asks: Where are the sites of international memory? What are the elements of such memories of international pasts and of internationalism? How and why have we remembered or forgotten sites of international memory? Which elements of these international pasts are useful in the present? Some contributors address specific sites and moments: World War II liberation movements in India and Ethiopia, commemorations of genocide while other pieces concentrate more on the theoretical on the idea of cultural memory. UNESCO's presence looms large in the volume as it is the most visible and iconic international organization devoted to creating critical heritage studies on a world stage. Formed in the aftermath of World War II, UNESCO was instrumental in promoting the idea of a humanity that exists beyond national, regional or cultural borders or definitions. Since then, UNESCO's diplomatic and institutional channels

have become the sites at which competing notions of international world and human communities have jostled in conjunction with politically specific understandings of cultural value and human rights This volume has been assembled to investigate sites of international memory that commemorate a past when it was possible to imagine identify and invoke international ideas institutions and experiences in diverse historically situated contexts Contributors Dominique Biehl Kristal Buckley Roland Burke Kate Darian Smith Sarah C Dunstan David Goodman Madeleine Herren Philippa Hetherington Rohan Howitt Alanna O Malley Eric Paglia Glenda Sluga Sverker Srin Carolien Stolte Beatrice Wayne Ralph Weber Jay Winter

Bjorklund, 2000-05-01 As one of the most hotly debated topics of the past decade false memory has attracted the interest of researchers and practitioners in many of psychology's subdisciplines Real world issues surrounding the credibility of memories particularly memories of traumatic events such as sexual abuse reported by both children and adults have been at the center of this debate Were the adults actually retrieving repressed memories under the careful direction of psychotherapists or were the memories being created by repeated suggestion Were children telling investigators about events that actually happened or were the interviewing techniques used to get at unpleasant experiences serving to implant memories that eventually became their own There is evidence in the psychological research literature to support both sides and the potential impact on individuals families and society as a whole has been profound This book is an attempt to cut through the undergrowth and get at the truth of the recovered memory false memory creation puzzle The contributors review seminal work from their own research programs and provide theory and critical evaluation of existing research that is necessary to translate theory into practice The book will be of great value to basic and applied memory researchers clinical and social psychologists and other professionals working within the helping and legal professions *Memory and History in Argentine Popular Music* Delia Pamela Fuentes Korman, 2023-01-30 Memory and History in Argentine Popular Music

examines Argentine popular music of the 1990s and early 2000s that denounced immortalized and reflected on the processes that led to the socioeconomic crisis that shook Argentine society at the end of 2001. It draws upon the three most popular genres of the time: tango, rock, and cumbia villera, a form of cumbia from the shantytowns. The book analyzes lyrics from these three genres, detailing how they capture the feel of daily life and the changes that occurred under the neoliberal economic model that ravaged the country throughout the 90s. The contention is that these are *canciones con historia* (songs with history) that depict historical events and tell personal stories. Therefore, the lyrics from all three genres serve as accounts of historical events and social and economic changes, denouncing the social inequalities caused by neoliberal economic policies. Furthermore, the book explores how the process of remembering and forgetting takes place on the Internet. It examines how users navigate video sharing portals and use music to create virtual sites of memory, a term that extends Winter's conception of physical sites of memory to digital environments as virtual sites of commemoration.

Places of Memory: Spatialised Practices of Remembrance from Prehistory to Today Christian Horn, Gustav Wollentz, Gianpiero Di Maida, Annette Haug, 2020-09-24. This book examines spatialised practices of remembrance and its role in reshaping societies from prehistory to today. It presents a reflection on the creation of memories through the organisation and use of landscapes and spaces that explicitly considers the multiplicity of meanings of the past.
