Korten,1999-02-01 There is a deep chasm between the promises of the new global capitalism and the reality of social breakdown spiritual emptiness and environmental destruction it is leaving in its wake In this important book David Korten makes a compelling and well documented case that capitalism is actually delivering a fatal blow not only to life but also to democracy and the market Among his startling ideas Capitalism is a pathology that commonly afflicts market economies in the absence of vigilant public oversight Since the economy internal to a corporation is a planned economy the current consolidation of economic control under a handful of global corporations is a victory for central planning not the market economy The alternative to the new global capitalism is a global system of thriving healthy market economies that function as extensions of healthy local ecosystems to meet the livelihood needs of people and communities Radical as such proposals may seem they actually reflect processes that are steadily gaining momentum around the world The Post Corporate World provides a vision of what s needed and what s possible as well as a detailed agenda for change Korten shows that to have a just sustainable and compassionate society concentrated absentee ownership and footloose speculative capital as embodied in the global for profit public corporation must be eliminated in favor of enterprises based on patient rooted stakeholder ownership limited to those who have a stake in the firm as a worker supplier customer or member of the community in which it is located Korten outlines numerous specific actions to free the creative powers of individuals and societies through the realization of real democracy the local rooting of capital through stakeholder ownership and a restructuring of the rules of commerce to create mindful market economies that combine market principles with a culture that nurtures social bonding and responsibility Like Korten s previous bestseller When Corporations Rule the World this provocative book is sure to stimulate national dialogue and debate and inspire a bevy of grassroots discussions and initiatives The Post Corporate World presents readers with a profound challenge and an empowering sense of hope **Collected Papers in Theoretical Economics (Volume V): Economic Policy and Its Theoretical Bases** Kaushik Basu,2018-10-04 Effective policymaking is based on economics which is a blend of empiricism as well as theory It needs to be grounded not only in data statistics and the regularities observed

therein but also analytics deductive reasoning and logic which are the constituents of theory Published during 2009 16 the seven years that Basu spent as a policymaker first as chief economic adviser to the Government of India and then as chief economist of the World Bank this volume draws on the work done by empirical economists and is rooted in analytics even while addressing practical down to earth problems The papers having a direct bearing on economic policymaking in this quintessential compilation range from topics such as financial regulation global policy coordination aspects of the Indian economy like fiscal and monetary policy design inflation management food grain policy and more generally the influence of theory on government policymaking The volume addresses some of the most compelling challenges of our times from the global financial crisis and sub prime mortgage breakdown to corruption control and the design of interventions to provide subsidized food to the disadvantaged segments of society

The Financial Crisis in Constitutional Perspective Poul F Kjaer, Gunther Teubner, Alberto Febbrajo, 2011-07-27 This volume presents the first thorough sociologically informed legal analysis of the financial crisis which unfolded in 2008 It combines a multitude of theoretically informed analyses of the causes dynamics and reactions to the crisis and contextualises these within the general structural transformations characterising contemporary society It furthermore explores the constitutional implications of the crisis and suggests concrete changes to the constitutional set up of contemporary society Although the question of individual responsibility is of crucial importance the central idea animating the volume is that the crisis cannot be reduced to a mere failure of risk perception and management for which individual and collective actors within and outside of financial organisations are responsible The 2008 crisis should rather be understood as a symptom of far deeper structural transformations For example contemporary society is characterised by massive accelerations in the speed with which societal processes are reproduced as well as radical expansions in the level of globalisation These transformations have however been asymmetrical in nature insofar as the economic system has outpaced its legal and political counterparts The future capability of legal and political systems to influence economic reproduction processes is therefore conditioned by equally radical transformations of their respective operational forms and self understanding Potentially the 2008 crisis therefore has far reaching constitutional implications

Critical theory and legal autopoiesis Gunther Teubner, 2019-05-10 This volume collects and revises the key essays of Gunther Teubner one of the world's leading sociologists of law Written over the past twenty years these essays examine the dark side of functional differentiation and the prospects of societal constitutionalism as a possible remedy Teubner's claim is that critical accounts of law and society require reformulation in the light of the sophisticated diagnoses of late modernity in the writings of Niklas Luhmann Jacques Derrida and select examples of modernist literature Autopoiesis deconstruction and other post foundational epistemological and political realities compel us

to confront the fact that fundamental democratic concepts such as law and justice can no longer be based on theories of stringent argumentation or analytical philosophy We must now approach law in terms of contingency and self subversion rather than in terms of logical consistency and rational coherence
