Democracy Accountability And Representation Cambridge Studies In The Theory Of Democracy:

Democracy, Accountability, and Representation Adam Przeworski, Susan C. Stokes, Bernard Manin, 1999-09-13 This book examines whether mechanisms of accountability characteristic of democratic systems are sufficient to induce the representatives to act in the best interest of the represented The first part of the volume focuses on the role of elections distinguishing different ways in which they may cause representation The second part is devoted to the role of checks and balances between the government and the parliament as well as between the government and the bureaucracy Overall the essays combine theoretical discussions game theoretic models case studies and statistical analyses within a shared analytical approach and a standardized terminology The empirical material is drawn from the well established democracies as well as from new democracies

Democratic Elitism ,2010-01-11 Joseph Schumpeter's competitive theory of democracy often labeled democratic elitism has struck many as an apt and insightful description of how representative democracy works even though convinced democrats detect an elitist thrust they find disturbing But neither Schumpeter nor subsequent defenders of democratic elitism have paid enough attention to actual behaviors of leaders and elites Attention has been riveted on how adequately democratic elitism captures the relationship between governors and governed in its insistence that competitive elections prevent the relationship from being one way that is leaders and elites largely unaccountable to passive and submissive voters Why and how leaders and elites create and sustain competitive elections what happens if their competitions become excessively stage managed or belligerent how in short leaders and elites really act are some of the issues this book addresses Contributors are Heinrich Best Jens Borchert Michael Edinger Fredrik Engelstad Trygve Gulbrandsen John Higley Gabriella Ilonszki András Kórsányi Mindaugas Kuklys György Lengyel Anton Steen and Jacek Wasilewski

Controlling Governments José María Maravall, Ignacio Sánchez-Cuenca, 2008 How much influence do citizens have to control the government What guides voters at election time Why do governments survive How do institutions modify the power of the people over politicians The book combines academic analytical rigor with comparative analysis to identify how much information voters must have to select a politician for office or for holding a government accountable whether parties in power can help voters to control their governments how different institutional arrangements influence voters control why politicians choose particular electoral systems and what economic and social conditions may undermine not only governments but democracy Arguments are backed by vast macro and micro empirical evidence There are cross country comparisons and survey analyses of many countries In every case there has been an attempt to integrate analytical arguments and empirical research The goal is to shed new light on perplexing questions of positive democratic theory

Divided Sovereignty Carmen E. Pavel, 2015 An exploration of new institutional solutions to the old question of how to constrain states when they commit severe abuses against their own citizens The book argues that coercive international institutions can stop these abuses and act as an insurance scheme against the possibility of states failing to fulfill their most

basic sovereign responsibilities *The Theory and Practice of Legislation* Luc J. Wintgens,2017-03-02 This work provides a rational framework for legislation The unifying premise behind the essays is that although legislation and regulation are the result of a political process legislation and regulation can be the object of theoretical study The volume focuses on problems that are common to most European legal systems and the approach involves applying to legislative problems the tools of legal theory hence jurisprudence Whereas traditional legal theory deals predominantly with the application of law by the judge jurisprudence enlarges the field of study so as to include the creation of law by the legislator The original essays published in this collection expose and develop a range of new insights into the relationship between legislative problems and legal theory in a way which will engage and interest legal scholars throughout the world *The Eye and the Whip* Paul Lagunes,2021

Decentralization, Democratization, and Informal Power in Mexico Andrew Selee,2015-10-20 In the last two decades of the twentieth century many countries in Latin America freed themselves from the burden of their authoritarian pasts and developed democratic political systems At the same time they began a process of shifting many governmental responsibilities from the national to the state and local levels Much has been written about how decentralization has fostered democratization but informal power relationships inherited from the past have complicated the ways in which citizens voice their concerns and have undermined the accountability of elected officials In this book Andrew Selee seeks to illuminate the complex linkages between informal and formal power by comparing how they worked in three Mexican cities The process of decentralization is shown to have been intermediated by existing spheres of political influence which in turn helped determine how much the institution of multiparty democracy in the country could succeed in bringing democracy closer to home

Constitutional Ratification without Reason Jeffrey A. Lenowitz, 2022-03-10 This volume focuses on constitutional ratification the procedure in which a draft constitution is submitted by its creators to the people or their representatives in an up or down vote determining implementation Ratification is increasingly common and routinely recommended by experts Nonetheless it is neither neutral nor inevitable Constitutions can be made without it and when it is used it has significant effects This raises the central question of the book should ratification be recommended Put another way is there a reason for treating the procedure as a default for the constitution making process Surprisingly these questions are rarely asked The procedure's worth is assumed not demonstrated while ratification is generally overlooked in the literature In fact this is the first sustained study of ratification To address these oversights this book defines ratification and its types explains the procedure's effects conceptual origins and history and then concentrates on finding reasons for its use Specifically it builds up and analyzes the three most likely normative justifications These urge the implementation of ratification because the procedure enables the constituent power to make its constitution fosters representation during constitution making or helps create a legitimate constitution Ultimately these justifications are found wanting leading to the conclusion that ratification lacks a convincing context independent justification Thus until new arguments are developed experts should not give recommendations for ratification as a matter of course practitioners should not reach for it uncritically and more generally one should avoid the blanket application of concepts from democratic theory to extraordinary contexts such as constitution making

Interest Group Politics in Europe Jan Beyers, Rainer Eising, William A. Maloney, 2013-09-13 Interest organizations have always assumed a prominent place in European politics because they link states with citizens institutionalize the resolution of social

conflicts regulate important sectors of the economy and society contribute to workable policy outcomes and socialize members into democratic politics However the plethora of interest group studies that exist have not consolidated our understanding of these actors These analyses have been subject to the vagaries of different theoretical perspectives and vary greatly in their conceptual and methodological frameworks Consequently a not always complementary and fragmented series of findings has emerged This book is a systematic and comprehensive effort at investigating and integrating the state of the art in European interest group research Combining the analysis of interest group politics in the EU with the comparative study of interest organizations the book seeks to identify the areas about which there is consolidated knowledge that are marked by controversies in which considerable uncertainty exists that have been omitted from research programs and that ought to be part of future studies Thereby it provides a general reflection on how the study of interest group politics can be improved by linking it to the comparative study of governance This book was published as a special issue of West European Politics

Legislature by Lot John Gastil, Erik Olin Wright, 2019-04-09 Democracy means rule by the people but in practice even the most robust democracies delegate most rule making to a political class The gap between the public and its representatives might seem unbridgeable in the modern world but Legislature by Lot examines an inspiring solution a legislature chosen through sortition the random selection of lay citizens It's a concept that has come to the attention of democratic reformers across the globe Proposals for such bodies are being debated in Australia Belgium Iceland the United Kingdom and many other countries Sortition promises to reduce corruption and create a truly representative legislature in one fell swoop In Legislature by Lot John Gastil and Erik Olin Wright make the case for pairing a sortition body with an

elected chamber within a bicameral legislature Gastil is a leading deliberative democracy scholar and Wright a distinguished sociologist and editor of the Real Utopias series of which this is a part In this volume they bring together critics and advocates of sortition who have studied ancient Athens deliberative polling political theory social movements and civic innovation Without obscuring its limitations the contributors offer a wide variety of ideas for how to implement sortition and examine its potential for reshaping modern politics Legislature by Lot includes sixteen essays that respond to Gastil and Wright's detailed proposal Essays comparing sortition to contemporary reforms see it as a dramatic extension of deliberative minipublics which gather random samples of citizens to weigh public policy dilemmas without being empowered to enact legislation Another set of essays explores the democratic principles underlying sortition and elections and considers for example how a sortition body holds itself accountable to a public that did not elect it The third set of essays considers alternative paths to democratic reform which limit the powers of a sortition chamber or more quickly establish a pure sortition body With contributions by Arash Abizadeh Tom Arnold Terrill Bouricius Deven Burks Lyn Carson Dimitri Courant Donatella della Porta David M Farrell Andrea Felicetti James S Fishkin Brett Hennig Vincent Jacquet Rapha l Kies Tom Malleson Jane Mansbridge Christoph Niessen David Owen John Pitseys Min Reuchamps Yves Sintomer Graham Smith Jane Suiter and Pierre tienne Vandamme

Coping with Globalization Steve Chan, James R. Scarritt, 2013-01-11 This volume probes the interactions between domestic and international political economies and inquires about their effects in different regional and national contexts The contributors seek to identify persistent patterns as well as changing trends in regard to these important questions of theory and policy by applying systematic cross national analyses

The Morality of Conflict Samantha Besson, 2005-11-25 This book explores the relationship between the law and pervasive and persistent reasonable disagreement about justice It reveals the central moral function and creative force of reasonable disagreement in and about the law and shows why and how lawyers and legal philosophers should take reasonable conflict more seriously Even though the law should be regarded as the primary mode of settlement of our moral conflicts it can and should also be the object and the forum of further moral conflicts There is more to the rule of law than convergence and determinacy and it is important therefore to question the importance of agreement in law and politics By addressing in detail issues pertaining to the nature and sources of disagreement its extent and significance as well as the procedural institutional and substantive responses to disagreement in the law and their legitimacy this book suggests the value of a comprehensive approach to thinking about conflict which until recently has been analysed in a compartmentalized way It aims to provide a fully fledged political morality of conflict by drawing on the analysis of topical jurisprudential questions in the new light of disagreement Developing such a global theory of disagreement in the law should be read in the context of the broader effort of reconstructing a complete account of democratic law making in pluralistic societies The book will be of value not only to legal philosophers and constitutional theorists but also to political and democratic theorists as well as to all those interested in

public decision making in conditions of conflict
