technical textiles Provides updated detailed coverage of processes fabric structure and applications Ideal resource for those interested in high performance textiles textile processes textile processing and textile applications Many of the original recognized experts from the first edition update their respective chapters

New and Future Developments in Microbial Biotechnology and Bioengineering Vijai G. Gupta, Susana Rodriguez-Couto, 2018-02-06 New and Future Developments in Microbial Biotechnology and Bioengineering Penicillium System Properties and Applications covers important research work on the applications of penicillium from specialists from an international perspective The book compiles advancements and ongoing processes in the penicillium system along with updated information on the possibilities for future developments All chapters are derived from current peer reviewed literature as accepted by the international scientific community These important fungi were found to secrete a range of novel enzymes and other useful proteins and are still being extensively studied and improved for specific use in the food textile pulp and paper biocellulosic ethanol production and other industries The book caters to the needs of researchers academicians dealing with penicillium spp related research and applications outlining emerging issues on recent advancements made in the area of research and its applications in bioprocess technology chemical engineering molecular taxonomy biofuels bioenergy research and alternative fuel development In addition the book also describes the identification of useful compound combinations enzyme cocktails and the fermentation conditions required to obtain them at an industrial scale Finally the book provides updated information on the best utilization of these fungi as a natural tool to meet the next challenges of biotechnology Compiles the latest developments and current studies in the penicillium system Contains chapters contributed by top researchers with global appeal Includes current applications in bioindustry and lists future potential applications of these fungi species Identifies future research needs for these important fungi including the best utilization of them as a natural tool to meet the next challenges of biotechnology

Structure and Properties of High-Performance Fibers Gajanan Bhat, 2016-08-21 Structure and Properties of High Performance Fibers explores the relationship between the structure and properties of a wide range of high performance fibers Part I covers high performance inorganic fibers including glasses and ceramics plus carbon fibers of various types In Part II high performance synthetic polymer fibers are discussed while Part III reviews those natural fibers that can be used to create advanced textiles The high performance properties of these fibers are related to their chemistry and morphology as well as the ways in which they are synthesized and spun High performance fibers form the basis of textile materials with applications in protection medicine and composite reinforcement Fibers are selected for these technical applications due to their advanced physical mechanical and chemical properties Offers up to date coverage of new and advanced materials for the fiber and textile industries Reviews structure property relationships of high performance inorganic carbon synthetic polymer and natural fibers Includes contributions from an international team of authors edited by an expert in the field Reviews those natural fibers that can be used to create advanced textiles

Smart Textiles and

Their Applications Vladan Koncar, 2016-04-22 *Smart Textiles and Their Applications* outlines the fundamental principles of applied smart textiles also reporting on recent trends and research developments Scientific issues and proposed solutions are presented in a rigorous and constructive way that fully presents the various results prototypes and case studies obtained from academic and industrial laboratories worldwide After an introduction to smart textiles and their applications from the editor Part One reviews smart textiles for medical purposes including their use in health monitoring treatment delivery and assistive technologies Part Two covers smart textiles for transportation and energy with chapters covering smart textiles for the monitoring of structures and processes as well as smart textiles for energy generation The final section considers smart textiles for protection security and communication and includes chapters covering electrochromic textile displays textile antennas and smart materials for personal protective equipment Scientific issues and proposed solutions are presented in a rigorous and constructive way regarding various results prototypes and case studies obtained from academic and industrial laboratories worldwide Useful for researchers and postgraduate students and also for existing companies and start ups that are developing products involving smart textiles Authored and edited by an international team who are experts in the field ensure comprehensive coverage and global relevance Medical Textile Materials Yimin Qin, 2015-11-21 *Medical Textile Materials* provides the latest information on technical textiles and how they have found a wide range of medical applications from wound dressings and sutures to implants and tissue scaffolds This book offers a systematic review of the manufacture properties and applications of these technical textiles After a brief introduction to the human body the book gives an overview of medical textile products and the processes used to manufacture them Subsequent chapters cover superabsorbent textiles functional wound dressings bandages sutures implants and other important medical textile technologies Biocompatibility testing and regulatory control are then addressed and the book finishes with a review of research and development strategy for medical textile products Provides systematic and comprehensive coverage of the manufacture properties and applications of medical textile materials Covers recent developments in medical textiles including antimicrobial dressings drug releasing materials and superabsorbent textiles Written by a highly knowledgeable author with extensive experience in industry and academia *Antimicrobial Textiles* Gang Sun, 2016-04-11 *Antimicrobial textiles* have attracted a great deal of interest in recent years due to their potential for reducing the transmission of infection in medical and healthcare environments Antimicrobial properties can also improve the performance and lifespan of consumer products and so these fabrics are increasingly finding applications in the wider textile and apparel industry This book provides systematic coverage of the technologies and materials required for developing these important textiles In Part One chapters address key issues and technologies in the creation of antimicrobial textile products Topics covered include testing and regulation microencapsulation sol gel coating and plasma technologies nanotechnology and life cycle assessment Part Two then reviews key antimicrobial agents such as N halamines plant based compounds and photo active chemicals Finally the

chapters of Part Three offer detailed reviews of antimicrobial textiles for particular important applications including medical devices protective clothing and products with improved durability and longevity Reviews key issues and technologies in the creation of antimicrobial textile products Offered a detailed overview of by antimicrobial agents and a wide range of important applications Produced by an experienced editor and a distinguished and international team of contributors

Electronic Textiles Tilak Dias, 2015-04-28 The integration of electronics into textiles and clothing has opened up an array of functions beyond those of conventional textiles These novel materials are beginning to find applications in commercial products in fields such as communication healthcare protection and wearable technology Electronic Textiles Smart Fabrics and Wearable Technology opens with an initiation to the area from the editor Tilak Dias Part One introduces conductive fibres carbon nano tubes and polymer yarns Part Two discusses techniques for integrating textiles and electronics including the design of textile based sensors and actuators and energy harvesting methods Finally Part Three covers a range of electronic textile applications from wearable electronics to technical textiles featuring expert chapters on embroidered antennas for communication systems and wearable sensors for athletes Comprehensive overview of conductive fibres yarns and fabrics for electronic textiles Expert analysis of textile based sensors design integration of micro electronics with yarns and photovoltaic energy harvesting for intelligent textiles Detailed coverage of applications in electronic textiles including wearable sensors for athletes embroidered antennas for communication and electronic textiles for military personnel

Textile Chemistry Thomas Bechtold, Tung Pham, 2023-04-03 Textile and fibre chemistry form the theoretical basis to understand production and properties of textile based products In this 2nd edition fundamentals of textile chemistry and theoretical and applicatory aspects of colour chemistry are interconnected to draw detailed picture of chemical reactions occurring during production and modification of textile products An overview about chemical modification finishing operations is given to explain how to impart special functionalities into functional products Examples for technical scale processes and representative machinery used therein give insight into the technical reality of a dyehouse A new chapter about circularity of textiles highlights the interlinkage between product design including dyes and finishes and the requirements to develop future fibre to fibre recycling The work covers all relevant aspects of a textile product from fibre production coloration finishing consumer use and fibre to fibre recycling The content of the book allows a first entry into this multi disciplinary field Through its comprehensive character the authors explain the interdependence between textile and fibre processing and aspects of recycling which makes the work a valuable source of information to design future textiles for circularity *Handbook of Life Cycle Assessment (LCA) of Textiles and Clothing* Subramanian Senthilkannan

Muthu, 2015-07-25 Life cycle assessment LCA is used to evaluate the environmental impacts of textile products from raw material extraction through fibre processing textile manufacture distribution and use to disposal or recycling LCA is an important tool for the research and development process product and process design and labelling of textiles and clothing

Handbook of Life Cycle Assessment LCA of Textiles and Clothing systematically covers the LCA process with comprehensive examples and case studies Part one of the book covers key indicators and processes in LCA from carbon and ecological footprints to disposal re use and recycling Part two then discusses a broad range of LCA applications in the textiles and clothing industry Covers the LCA process and its key indicators including carbon and ecological footprints disposal re use and recycling Examines the key developments of LCA in the textile and clothing industries Provides a wide range of case studies and examples of LCA applications in the textile and clothing industries

Geotextiles Robert Koerner, 2016-02-11

Geotextiles From Design to Applications presents valuable information on the high performance fabrics used in soil separation drainage filtration reinforcement and cushioning These polymeric materials offer solutions for geoenvironmental and other civil engineering specialties due to their advanced physical mechanical hydraulic and endurance properties This important book offers comprehensive coverage of the manufacture functions properties designs and applications of geotextiles Part One begins with a chapter on the history of geotextiles followed by chapters giving detailed reviews of the types of fabrics and their manufacturing processes from resin type to fiber extrusion to textile fabrication Part Two covers the properties behavior and testing of geotextiles with Part Three focusing on applications dealing with the specific primary functions of geotextiles In Part Four chapters offer numerous general applications of geotextiles including those in waste containment marine engineering walls slopes agriculture and erosion control Finally the chapters of Part Five address quality control and assurance for geotextiles and the increasingly important topic of sustainability Reviews the types of fabrics used for geotextiles and their manufacturing processes Covers the properties behavior and testing of geotextiles Contains detailed discussions of the primary functions of geotextiles and their wide range of applications

Information Systems for the Fashion and Apparel Industry Tsan-Ming Jason Choi, 2016-04-13

Information Systems for the Fashion and Apparel Industry brings together trends and developments in fashion information systems industrial case studies and insights from an international team of authors The fashion and apparel industry is fast growing and highly influential Computerized information systems are essential to support fashion business operations and recent developments in social media mobile commerce models radio frequency identification RFID technologies and ERP systems are all driving innovative business measures in the industry After an introductory chapter outlining key decision points and information requirements in fast fashion supply chains Part One focuses on the principles of fashion information systems with chapters covering how decision making in the apparel supply chains can be improved through the use of fuzzy logic RFID technologies evolutionary optimization techniques and artificial neural networks Part Two then reviews the range of applications for information systems in the fashion and apparel industry to improve customer choice aid design implement intelligent forecasting and procurement systems and manage inventory and returns Provides systematic and comprehensive coverage of information systems for the fashion and apparel industry Combines recent developments and industrial best practices in apparel supply

chain management in order to meet the needs of the fashion and apparel industry professionals and academics Features input from a team of highly knowledgeable authors with a range of professional and academic experience overseen by an editor who is a leading expert in the field Reviews the range of applications for information systems in the fashion and apparel industry to improve customer choice aid design implement intelligent forecasting and procurement systems and manage inventory and returns

Garment Manufacturing Technology Rajkishore Nayak,Rajiv Padhye,2015-05-26 Garment Manufacturing Technology provides an insiders look at this multifaceted process systematically going from design and production to finishing and quality control As technological improvements are transforming all aspects of garment manufacturing allowing manufacturers to meet the growing demand for greater productivity and flexibility the text discusses necessary information on product development production planning and material selection Subsequent chapters covers garment design including computer aided design CAD advances in spreading cutting and sewing and new technologies including alternative joining techniques and seamless garment construction Garment finishing quality control and care labelling are also presented and explored Provides an insiders look at garment manufacturing from design and production to finishing and quality control Discusses necessary information on product development production planning and material selection Includes discussions of computer aided design CAD advances in spreading cutting and sewing and new technologies including alternative joining techniques and seamless garment construction Explores garment finishing quality control and care labelling

Textiles for Sportswear Roshan Shishoo,2015-05-28 Textiles for Sportswear is an important book that systematically covers key trends in design and materials the use of novel and smart fabrics and a range of specific applications The book begins by surveying the principles of textile applications in sport including design materials and production technology The uses of smart textiles in sportswear are then examined from intelligent materials to wearable technology Final sections of the text explore comfort in sportswear sportswear for protection and recent advances in sportswear technology that are currently being applied to particular sports Reviews the principles of textile applications in sport including design materials and production technology Examines the uses of smart textiles in sportswear Discusses how recent advances in sportswear technology are being applied to particular sports

Fabric Structures in Architecture J Llorens,2015-03-28 Fabric Structures in Architecture covers the varying ways textiles and their properties are used in building construction with particular focus given to tensile structures The text begins with the fundamental principles of textiles including the origins of fabric architecture then progressing to a discussion of the modern textiles of today It covers relevant textile materials and their properties including coatings and membranes In addition a range of design considerations are discussed with detailed information on installation and failure modes A series of case studies from around the world accompany the discussion illustrating the applications of textiles in architecture Offers key coverage of the fundamental principles from the origins of fabric architecture to modern textile Provides analysis of relevant textile materials and their

properties including coatings and membranes Contains expert insights in to the applications of textiles in architecture presenting a series of relevant case studies from around the world
