DePaul Common Core Activities:

Academic Ethos Management Agata Stachowicz-Stanusch, 2012-12-04 This topical and much needed book constitutes an important part of the debate on the integrity in an academic context as a sine qua non of responsible management education. Like you we've all been listening to the highly publicized corporate scandals and instances of management misconduct that have eroded public faith. Simultaneously management scholars and educators have begun to question the assumptions underlying the traditional management education which in their view not only contributed to a recent moral crisis but has also failed to prepare students and executives for coping with the responsible leadership challenges and ethical dilemmas that face managers in contemporary corporations. This book discusses with stimulating examples how universities should bring alive their core values. Using case studies and examples from universities from all over the world you'll learn real practical advice and guidance which explain in detail how you and other administrators and educators should discover, articulate and institutionalize implementation, securing and controlling by creating adequate policies, procedures, process etc. university core values into academic daily activities and create a foundation for academy integrity. **Literature Activities**

Teens Actually Love Beth Ahlgrim, Bill Fritz, Jeremy Gertzfield, Lisa Lukens, 2021-09-03 Instead of asking literature to meet the entertainment, cultural and of course educational needs of today's youth, *Literature Activities: Teens Actually Love* empowers teachers to guide students in working with literature on their own terms in order to rediscover the joys it holds. Through a variety of innovative and highly engaging projects, this book will develop a new lens through which to view literature and its study with activities that are at once highly entertaining yet encourage higher order thinking skills and strategies. Lesson plans incorporating alternatives as diverse as Facebook and quilting show how teachers and students can bridge the technology gap by finding creative solutions to traditional academic problems. By allowing students to use their technological skills to move from print to nonprint assessments, students will have the opportunity to explore the text with a greater degree of ownership over the process, resulting in autonomous learners. synthesis Early Childhood Curriculum for All Learners Ann M. Selmi, Raymond J. Gallagher, Eugenia R. Mora-Flores, 2014-08-12 Early Childhood Curriculum for All Learners Integrating Play and Literacy Activities is designed to teach early childhood professionals about the latest research on play and early literacy and then to show them practical methods for adapting this research to everyday classroom practices that will encourage the development of learning skills. The authors link solid play based research to specific developmentally appropriate practices. By combining these two areas the text demonstrates that academic learning and play activities are highly compatible and that children can and do develop academic skills through play. In addition the text focuses on socio dramatic play a recently acknowledged essential aspect of child initiated play interactions. It provides specific strategies that link these interactive behaviors with the early academic skills needed for the initial primary grades. Implementation of the information presented in this book will enable children to experience a richer transition into primary education classrooms *Fiske Guide to Colleges* Edward B. Fiske, 2006 The best college guide you can buy USA Today **DePaul Business & Commercial Law Journal**, 2006 The Insider's Guide to the Colleges, 2005 Yale Daily News Staff, 2004-07 College students discuss what colleges are really like including grades sports social life alcohol policies gender relations admissions and classes **The Guide to COIL Virtual Exchange** Jon Rubin, Sarah Guth, 2023-07-03 This is the authoritative guide to implementing COIL Virtual Exchange conceived and co edited by one of the originators of this innovative approach to internationalization. Jon Rubin COIL the acronym for Collaborative Online International Learning is a central modality of what has come to be known as virtual exchange. Since its first iteration in 2002 it has gradually established itself as a mature pedagogy that is being increasingly implemented across the world and is validated by a growing body of research. COIL Virtual Exchange at its most essential is a bi lateral online exchange involving the integration of existing courses across two or sometimes more institutions that are geographically and or culturally distinct. To launch a COIL VE course the instructor of a class at a higher education institution in one location links online with a professor and his or her class in another region or country. Together their students engage and develop joint projects usually over a continuous five to eight week period. Compared to the limited number of students worldwide who can engage in study abroad COIL VE potentially opens up more equitable and inclusive participation in international education and intercultural experiences to all students. Involves them in rigorous disciplinary and interdisciplinary studies and promotes close and constructive engagement with students with different cultural perspectives. While many COIL courses are launched by individual instructors based on their research connections and online outreach they are being increasingly supported and led by dedicated COIL Coordinators who facilitate virtual exchanges and provide professional development. This comprehensive guide covers COIL VE pedagogy provides examples of what takes place in the COIL classroom and explores what instructors and staff need to know to facilitate and support a variety of COIL courses across the curriculum. It addresses how institutional stakeholders especially those in leadership positions can develop and embed a successful COIL initiative at

their institution. It offers varied perspectives of COIL viewed from different institutional and cultural vantage points from research universities, community and technical colleges, and university systems and describes how COIL VE is developing in five different world regions presenting eleven case studies. The book concludes with a guide to thirteen global organizations that support COIL and other forms of VE. Additionally, the book provides links to the COIL Connect for Virtual Exchange website <https://coilconnect.org> which includes an updated directory of organizations, an expanding database of faculty and institutions participating in COIL, and looking for partners, course templates, survey data, and case studies. This book offers faculty and administrators across the world, whether formally involved in international education, in service learning, and community engagement, or wanting to incorporate a cross-cultural perspective in their disciplinary courses, theoretical foundations, guidance on effective collaboration, and the strategic and pedagogical considerations to develop robust COIL VE courses and programs.
