Cell Structure and Function by Microspectrofluorometry Elli Kohen, 2014-06-28 Cell Structure and Function by Microspectrofluorometry provides an overview of the state of knowledge in the study of cellular structure and function using microspectrofluorometry The book is organized into six parts Part I begins by tracing the origins of modern fluorescence microscopy and fluorescent probes Part II discusses methods such as microspectroscopy and flow cytometry the fluorescence spectroscopy of solutions and the quantitative implementation of fluorescence resonance energy transfer FRET in the light microscope Part III presents studies on metabolism including the mechanism of action of xenobiotics biochemical analysis of unpigmented single cells and cell to cell communication in the endocrine and the exocrine pancreas Part IV focuses on applications of fluorescent probes Part V deals with cytometry and cell sorting It includes studies on principles and characteristics of flow cytometry as a method for studying receptor mediated endocytosis and flow cytometric measurements of physiologic cell responses Part VI on bioluminescence discusses approaches to measuring chemiluminescence or bioluminescence in a single cell and measuring light emitted by living cells *Cell Structure and Function by Microspectrofluorometry* Elli Kohen, Joseph G. of Plant-Microorganism Interactions Michel Nicole, Vivienne Gianinazzi-Pearson, 2012-12-06 Plants interact with a large number of microorganisms which have a major impact on their growth either by establishing mutually beneficial symbiotic relationships or by developing as pathogens at the expense of the plant with deleterious effects These microorganisms differ greatly not only in their nature viruses phytoplasmas bacteria fungi nematodes but also in the way they contact penetrate and invade their host Histology and cytology have brought an essential contribution to our knowledge of these phenomena They have told us for instance how specialized structures of the pathogen are often involved in the adhesion and penetration into the plant how the interface between both organisms is finely arranged at the cellular level or what structural alterations affect the infected tissues They have thus set the stage for the investigations of the underlying molecular mechanisms could

be undertaken Such investigations have been remarkably successful in the recent years expanding considerably our understanding of plant microorganism interactions in terms of biochemical changes rapid modifications of enzymatic activities coordinated gene activation signal reception and transduction Biochemistry molecular biology and cellular physiology have taken precedence in the phytopathologist s set of methods **Forthcoming Books** Rose Army,1989-05

Flow Cytometry in Hematology Ole Didrik Laerum,Ole Didrik Lærum,Robert Bjerknes,1992 This book reviews flow cytometric methods techniques for measuring and sorting of cells used in hematology ranging from those in routine use such as leukocyte counting and immunophenotyping in diseases like leukemia and AIDS to those that have potential future use in experimental and clinical hematology This volume will be of interest to a wide audience including cell biologists hematologists cancer researchers and HIV AIDS researchers Fluorescent and Luminescent Probes for Biological Activity W. T. Mason,1999-04-16 The use of fluorescent and luminescent probes to measure biological function has increased dramatically since publication of the First Edition due to their improved speed safety and power of analytical approach This eagerly awaited Second Edition also edited by Bill Mason contains 19 new chapters and over two thirds new material and is a must for all life scientists using optical probes The contents include discussion of new optical methodologies for detection of proteins DNA and other molecules as well as probes for ions receptors cellular components and gene expression Emerging and advanced technologies for probe detection such as confocal laser scanning microscopy are also covered This book will be essential for those embarking on work in the field or using new methods to enhance their research TOPICS COVERED Single and multiphoton confocal microscopy Applications of green fluorescent protein and chemiluminescent reporters to gene expression studies Applications of new optical probes for imaging proteins in gels Probes and detection technologies for imaging membrane potential in live cells Use of optical probes to detect microorganisms Raman and confocal raman microspectroscopy Fluorescence lifetime imaging microscopy Digital CCD cameras and their application in biological microscopy **Molecular and Cellular Enzymology** P. Jeanteur,2012-12-06 Proteins constitute the working class molecules of the cell Hence understanding the way they act is a prerequisite for understanding how a cell functions and how life evolves Aspects such as the protein ligand relationship recognition protein evolution by point mutation enzyme substrate interactions behaviour of an enzyme in a living cell control and dynamics of enzyme networks as well as the physico chemical background of enzyme actions and multi enzyme complexes are comprehensively treated in this volume **International Review of Cytology** Kwang W. Jeon,2004-09-08 International Review of Cytology presents current advances and comprehensive reviews in cell biology both plant and animal Authored by some of the foremost scientists in the field each volume provides up to date information and directions for future research Articles in this volume address transcription in haploid male germ cells free radicals in cell biology experimental studies on sexual reproduction in diatoms vertebrate thymus and the neurotrophin system and visualization of molecular activities inside living cells with fluorescent labels

The British National Bibliography Arthur James Wells,1992 **Photobiology** E. Riklis,2012-12-06 It is not always the case that the subject of a scientific book and its relevance to everyday life are so timely Photobiology and its sister subject Radiobiology are now a must for understanding the environment we live in and the impact light ultraviolet light and radiation have on all aspects of our life Photobiology is a true interdisciplinary field Photobiology research plays a direct role in diverse fields and a glance at the topics of the symposia covered in this book by over 100 articles shows the breadth and depth of knowledge acquired in fundamental research and its impact on the major issues and applied problems the world is facing Half a century of photobiology research brought about an understanding of the importance of light to life both as a necessary source of energy and growth as well as its possible dangers Research in photochemistry and photobiology led to the discoveries of cellular repair mechanisms of UV induced damages to DNA and this led to understanding of the effects of hazardous environmental chemicals and mutagenicity and to the development of genetic engineering This topic was given due emphasis in several symposia and chapters in this book *Books in Print* ,1994 Proceedings of Optical Diagnostics of Biological Fluids and Advanced Techniques in Analytical Cytology ,1997 Membranology and Subcellular Organelles E. Edward Bittar,1992 **Books in Print Supplement** ,1994 **Membranology and Subcellular Organelles** Edward Bittar,1992-09-01 The present volume represents an effort at presenting the subject of membrane biochemistry and the organization and dynamics of subcellular organelles in an exciting and somewhat tentative manner Tentative in the sense that facts and theories are often kept clear and distinct and alternative ways of thinking are suggested Thus if the thoughtful student not only comprehends the significance of this subject but goes on to develop an appetite for more of it then this volume will have indeed served its primary purpose **Optical Engineering** ,1989 Publishes papers reporting on research and development in optical science and engineering and the practical applications of known optical science engineering and technology
